1. Trade: Color 486-50 Laptop for Shortwave Radio

Newsgroup: rec.radio.amateur.swap
Date: 2000-01-01 00:00:00 UTC
From: rm <rmudge@hotmail.com>
Message-ID: <386E2460.A651BB02@hotmail.com>

Cross-posted to: alt.ham-radio.marketplace,rec.antiques.radio+phone,rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.swap

I have a Packard Bell 486-50 Color Laptop.
12 Meg Ram
500 Meg Hard Disk
1 PCMCIA Slot
Windows 95

Works fine. Except the floppy drive does not work, but I will send a
cable which you use with Win95 direct connect. In this way you can
transfer files between two computers. The internal lithium battery for
the CMOS need to be replace and the NICAD does not charge. I leave
is plugged in and it works fine. The CMOS once set stays.

I have a 28.8/33.6 Megahertz X Jack modem and Xircom Network PCMCIA
card I will through in if the trade warrants. (I don't have a dongle
for the
network card but you can easily buy on from Xircom.)

I am looking for Sony or Zenith (TransOceanic) Transistor shortwaves.

Thanks,

RM

2. FS:New On-glass antenna, unknown brand.

Newsgroup: rec.radio.amateur.swap
Date: 2000-01-02 00:00:00 UTC
From: ghopper@eskimo.com
Message-ID: <ghopper-0201002240540001@08-164.009.popsite.net>

I bought this antenna when my Larsen on-glass antenna failed to work properly on my new car. Then I found out that something in the windshield tint was interfering with the coupling of the two halves of the antenna. The two antennas went in a drawer for 3 years. Now I'm cleaning up my "shack". I don't remember what the brand was and a check of catalogs and receipts reveals no further clues. The antenna is in as near perfect condition as it can get short of being in the shrinkwrap.

Includes: Antenna element, base plate for element, coupling on the inside of the car, coax with connectors and a brand new mounting kit.

Picture: http://www.eskimo.com/~ghopper/onglass2.jpg

$45 plus shipping.

I have a HP 95LX Handheld PC in Near perfect condition. Runs on 2x"AA" standard batteries. It has Lotus 1-2-3, a HP Advanced Financial Calculator, Appointment and Phone Book, Memo Editor, Data communications capability and a file manager. Features MSDOS Version 3.22, full QWERTY keyboard LCD graphics display - 16 lines by 40 columns. Includes manuals, PC, and whatever else came with the palmtop. Perfect for mobile packet or whatever other cool dos based ideas you can come up with. I had intended to use it to set up a backpack portable packet station. I never found the time.

Also included is the optional communication kit which consists of a cable to connect the HP 95LX to a pc through a serial cable, software and manual. I am willing to sell this seperately once the 95 sells.

$115 including shipping. Firm.

In my book, $15 is very close to $11. Especially after finding or buying a carton, packing and driving somewhere to ship it. Never mind filling out forms.
Al

I'm looking to buy a desoldering station with the vacuum pump built in.
I'd prefer a Pace or Hokka system but will consider all offers. Please
respond directly to me at ghopper@eskimo.com

Thanks

Hello,

I originally purchased the equipment below for an amateur radio project, but I lost interest in pursuing the project. If anyone else would like to try their hand, or whatever, please be my guest. Phones are in good working condition far as I can tell. Would like to sell everything as a package. Serious offers considered.
TERMS: Prepayment by postal money order, prices include UPS ground shipping or USPS Insured where applicable. I will also consider trades for Motorola Star-Tac accessories such as a Motorola Star-Tac Desktop Charger(s), high capacity Lithium-Ion batteries (black), etc.

(1) DiamondTel Mesa 90X, in very good condition, with tabletop phone/spare battery charger, two standard NiMh batteries, car adapter, and instruction manual ..... $ 40.00

(1) Motorola "Flip Fone", lt. gray. This phone is in good condition with standard battery and tabletop phone/spare battery charger ..... $ 25.00

I also have the following accessories:

(2) used antennas, one "back of the set" antenna and a "window" portable, both rubber ducks ..... $ 5.00

(1) used battery eliminator for the DiamondTel 90X ..... $ 5.00

(1) Brand New in the package battery eliminator for the DiamondTel Mesa 90X ..... $ 10.00

(1) Brand New in the package 6V NiMh Lt. Gray battery for Motorola "Flip Fones", Micro-Tac, etc. ..... $ 10.00

(5) Brand New in the package 6V NiMh Black batteries for Motorola "Flip Fones", Micro-Tac, Flare, Elite, etc. .....(EACH)$ 10.00

(3) Brand New in the package NiMh batteries for DiamondTel (EACH)$ 10.00

If interested, please e-mail directly n3fvg@worldlynx.net Thank You

Ham Radio University - HRU2000
Babylon Town Hall Annex
Phelps Lane & Miller Ave
North Babylon, NY
Sunday January 23, 2000
9:00 AM - 2:00 PM

This is a special day of education for amateur radio. Many ham radio Clubs and organizations from the New York City-Long Island Section will have information booths. This is your opportunity to meet the local clubs and organizations and learn their activities, meetings and membership. There will be a free tune-up clinic, DXCC & WAS card checking, eye-ball qso room, a full VE session along fifteen technical forums with guest speakers from the NLI section.

Donation: $2.00. Spouses and children under 12 will be admitted free.

For more information via Internet: http://arrlhudson.org/nli/hru2000.htm

Contact: Phil Lewis N2MUN (631) 226-0698

FORUM SCHEDULE
10:00 - 10:45 AM

Hi;

Repair shops / tube audio gurus / radio buffs take a look!

One lot of tube shields for the 9 pin miniature tubes (12ax7,
12au7...etc) these are the twist-lock spring-loaded type used in
radio and tube audio gear.

There are over 300 in the lot and the current bid is $15.50. I have
seen these go for over a buck a piece at hamfests and over $3.00 each
on the net.

Stock up now!

Don't miss out on this one!

You hook it up to 480 vac line and have a fast peak
reading wattmeter !!!

NOTE: This is a new listing. If you contacted me before about another T/R switch, please contact me again; I've lost some email files.

Have just found (in a local estate I'm helping to liquidate) a VERY nice E.F. Johnson model 250-39 T/R switch. It is Collins-scale excellent cosmetically and electronically. It is complete, looks great, works great, and is ready to go. I can sell it for $145 + $5 to ship. Tks es 73!

Hi;

Repair shops / tube audio gurus / radio buffs take a look!

One lot of tube shields for the 9 pin miniature tubes (12ax7,
12au7...etc) these are the twist-lock spring-loaded type used in
radio and tube audio gear.

There are over 300 in the lot.

Stock up now!

Don't miss out on this one! Only 22 hours left to bid!

I am selling my Kenwood TS-850SAT for $1150.00. Here is what is included:

TS-850SAT
MC-80
SP-31
IF-232
YK-88SN-1
YK-88CN-1
YG-455SN-1
DVRU

I have original boxes for the TS-850, SP31, YK-88SN-1 and the YK-88CN-1. The other boxes are lost thru carelessness.....

Condition is very good to excellant.

Was used by a little old lady (BFB) who only talked to her neighbor (?). No, that was the truck, I think.

I am the original owner of this unit. It has not been bastardized to put it on 11 meters or "MARS". It is truly in factory condition. You want to break it, buy it!

Hi;

One lot of (250) 9 pin miniature tube shields. These are for the
12AX7, 12AU7 ...etc tubes. Current bid is only $10.50 on the entire
lot.

I have seen these go for over $3.00 each on the net.

This is the last lot I will have up. I doubt you will ever find a deal
like this again!

He he - or by looking at it through a pair of CB glasses!

Oh and don't forget to ground it to that bucket of salt water in your trunk!

Otherwise you will only get 2,800 Watts output to your K-40, good buddy!

I have a very clean and neat and 100% operating Icom 73 that has the narrow cw filter, mike and power cord. It has been refinished with a baked on course charcoal green splatter that is extremely attractive and DOESN'T GET SCRATCHED UP NO MORE, when going from rental car to rental car that I did for years. It is a solid radio, anyone that has owned one will tell you it has a really hot receiver. I have dxcc mobile, wac and was mobile with this rig. 295.00 shipped CONUS. You think it's not a handsome rig, ship it back within 2 days from your receipt of the rig. This is a good looking work horse.

ICOM IC-706 HF + 6M + 2M Radio $1400(Canadian) or reasonable offer
Comes with MB-62 Mobile mounting bracket for faceplate & OPC-581 3.5M
separation
cable, original box, spare power cables, manual, and manual for CIV control.
Excellent like new condition. Radio specs are
100W HF all mode, all bands, except AM which is 40W,
100W on 6M all mode, and
10 W on 2M all mode. (Amplifier listed below)

Heil HM-10-Dual microphone (type 4 and type 5 cartridge) $150 c/w FS-1
Foot switch and MA-1 Adjustable boom.

MFJ 949E Deluxe Versa Tuner II $150 Like new, works great

Daiwa LA-2080H 2M Linear (FM + AM/SSB/CW) amp with preamp $150 Brand new
still in box

Bencher BY-1 Iambic Paddle (black base) $75

All prices listed in Canadian currency. I have been using the station for
approx 1 year, and now must sell quick. I have received excellent
signal/audio reports from all around the globe.
I would prefer to sell the items as a package for $1800 obo but will
consider seperating for pricing listed above. To buy the tranceiver, you
must provide me with proof of a valid amateur radio licence.

89. FS: Cushcraft R-5 ant., two 2m/440MHz transceivers

Newsgroup: rec.radio.amateur.swap
Date: 2000-01-30 00:00:00 UTC
From: Jerry Bransford <jerrypb@home.com>
Message-ID: <38948FCB.33B11EA7@home.com>
Source record: 7437
Cross-posted to: rec.ham-radio.swap,alt.radio.amateur,rec.radio.amateur.swap,rec.radio.amateur.equipment,rec.radio.swap

1) The Cushcraft R-5 is a vertical 12/12/15/17/20 meter antenna, it needs no ground planes. It is "as new" in its original box. It was up on my house for four hours before a neighbor demanded it be taken down (CC&Rs) (No need for advice on CC&Rs though!!). Best offer, $100 or better, takes it.

2) ICOM IC-2SRA handheld 2m/440MHz 5 watt transceiver. This is the one with the extra receiver (and it's own small whip antenna) that receives all normal modes up through around 999 MHz or close to it. Includes manuals, box, rechargable batteries and charger. Best offer over $150.

3) Standard Twin Bander 144/450 MHz FM Transceiver C5718DA. Mobile 50 watt transceiver with all the controls and display in the microphone itself. This includes the extra-long cord so the remote 'box' can be mounted in the trunk if you like. Best offer over $150. Includes original box and manuals. The memory upgrade, 100 channels, is included.

Serious offers only please.

I don't need a mounting bracket, and I can figure it out without the manual. I use Plantronics headsets for mikes on my gear. Thus, I only need the radio itself. Email the address to send you a check for the UPS charges.

I have an old Realistic TRC-X23 CB that reminds me of the Courier 23 that I had when I was a kid, in fact I'm sure it is the same radio. Only problem is someone removed the accessory plug and no power cord. I need the Sams CB-15 book or a copy of the schematic. If you have access to such, I am willing to pay for the book or copies, and would be most grateful!

Thanks,
Fred, N7FK

Had this preoblem also. sign the money order with his name
then sign your name below his. Then put "for deposit only",
"prior endorsements guaranteed" and deposit in your account.

Some here will tell you this is forgery. Your intent is to recover
your money. it was always yours and by leaving a "paper trail"
you have shown NO intent to defraud.

NOT advice. but it works.

My opinion

If your name is not on the money order, don't even waste time trying
to cash it without a receipt. Instead, write "for deposit only" on the
back and deposit it in your checking account. It may take a few days to
clear, but at least you'll have your money.

In the future, use Post Office money orders. There is a place on
these money orders for both the sender's and receiver's name. If it is
returned, the sender can also cash it.

I, on the other hand, have been burned by dishonest individuals selling stuff. Because of that, I will not do business with a person that will only ship after receiving money up front (money order, or whatever). In fact, I'm very wary of any individual that flatly refuses to ship COD.

You're the seller, Piero. You're the one that wants money. Therefore, in my book, you're the one who has to take the risks. If given a cloice between sending you money up front, or buying a product elsewhere for more, I'll shop elsewhere everytime.

Besides, why would I want to send money to a total stranger? When I buy from an established company, there is something more substantial on the other end. You're just some guy sitting in front of a computer. You would have to prove to me that you were honest before I would send you money up front (finance records, references, and/or anything else a real business would have). Even with a regular business there is no guarantee that the transaction will go smoothly, but it has a far better chance than it does when dealing with an individual.

Unless you do a lot of business, the situations you describe above are very rare. I've done business with UPS and FedEx for years and have only had problems a couple of times (usually circumstances other than a straight transaction involved).

You're claim that a person can file a "fraud complaint with the Postal Inspectors" really would make me nervious dealing with you. If you know as much as you suggest, than you should know that no investigation is launched unless large amounts of money are involved or a history of complaints exist. Therefore, to hide behind this to justify your business practice of accepting only money up front, when you know that

nothing will be done if the person complains about you (assuming you did rip someone off), clearly suggests to me that I would not want to do business with you.

always have the money orders made out with the buyers name and your own..
as Pay to "James Kilowatt" or "Cindy Hoo".. that way if you get it back then
there isnt a problem.

The only thing you need to do is write "Not used for purpose intended" on the back of the money order and sign it. They will refund. They keep a record of who bought it. I know, I'm in the banking business and that is how it would be handled with us.

Also, I would consider myself lucky that this individual, while a bit confused, was honest enough to return the money order. I would be disappointed that I didn't get the TNC, but again, you didn't loose your money.

KH

Yes you did get my attention!

But why spend $200 for a used 10m radio? You can
spend $249.95 at AES and get a brand new dual band
RCI 2950DX which covers the 10 & 12 meter bands.

FOR SALE

RCA BTA 1R1 1 KW broadcast transmitter. Operational. Tuned to the top portion of the broadcast band. Excellent (large) candidate for 160 or 75. This unit is in good condition for its age. (1960 ish) Scratches on cabinet and a few switches need new paddles. Needs 208-240 VAC single phase.

You will need a pickup for this baby. 1300 lbs, however the transformers are removed for ease of moving. Easy to load.

I would not be selling this except I can't afford to move it across the country. Estimates at $500.

Unit is in Toronto. You must pick up. Can not deliver.

$750 US or trade for ????? other ham gear. Old or new.

email me directly for pictures and for any questions.

The links in the last message MAY have been broken, these should work...

Please forward to EVERYONE on your mailing list!!!

Some of you will not reconize my e-mail address, I have several, and you are in my list (we have communicated via e-mail before). You are at risk, please take steps to protect yourself. READ THIS ENTIRE MESSAGE!!!

I received an e-mail a couple of days ago from a "Mark & Lyn". I assumed that
it was from some member here at the RV park, who's name I did not recognize. I came to find out this morning that the file attached to that message is a virus.
The file is named Pretty Park.exe

Pretty Park is a privacy invading worm. Every 30 seconds, it tries to e-mail itself to the e-mail addresses in your Microsoft Outlook address book. It has also been reported to connect your machine to a custom IRC channel for the purpose of retrieving passwords from your system.

My apologies to all who may have received it via me...

Chuck

Details of the e-mail message are at the bottom, here are some links to clean the program off your system... and prevent further problems.

For info on the virus, and a program to clean it off your system, go here... http://www.getvirushelp.com/PrettyPark/info.ssi

If your using Microsoft Outlook (comes with Internet Explorer), go here for a program that will scan your e-mail for attachments containing a virus...
http://download.cnet.com/downloads/0-10093-100-907946.html?tag=st.dl.10000_103_4.1st.titledetail

If your using Microsoft Outlook 97, go here for a security update...
http://download.cnet.com/downloads/0-10063-100-911311.html?tag=st.dl.10001_103_4.1st.titledetail

If your using Microsoft Outlook 98, go here for a security update...
http://download.cnet.com/downloads/0-10063-100-911308.html?tag=st.dl.10063_103_1.1st.titledetail

If your not using any kind of Virus Scanner go here and download the
best... McAfee Virus Scan (it's a big file, but worth the download time)...
http://download.cnet.com/downloads/0-10093-100-909955.html?tag=st.dl.10001_1

I am looking to buy a Highway Zapper. They don't make these anymore, and I cooked mine. They produce a 10.525 ghz signal that makes radar detectors go off. I'll consider home made items as well.
thanks

> Therefore, in my book, you're the one who has to take the risks. If
> given a cloice between sending you money up front, or buying a product
> elsewhere for more, I'll shop elsewhere everytime.

That is the bottom line. If you do a search on DejaNews, or see warnings about the person on the newsgroups...you can avoid the deal altogether.

> Besides, why would I want to send money to a total stranger? When I
> buy from an established company, there is something more substantial on
> the other end. You're just some guy sitting in front of a computer.
> You would have to prove to me that you were honest before I would send

> real business would have). Even with a regular business there is no
> guarantee that the transaction will go smoothly, but it has a far better
> chance than it does when dealing with an individual.

Absolutely true...even checking out the references of a person or business is not a guarantee that the deal will go smoothly.

> Unless you do a lot of business, the situations you describe above are
> very rare. I've done business with UPS and FedEx for years and have
> only had problems a couple of times (usually circumstances other than a
> straight transaction involved).

I mostly deal with UPS. FedEx has been problem after problem at work (Police Department) and at home. My department will no longer deal with FedEx at all.

> You're claim that a person can file a "fraud complaint with the Postal
> Inspectors" really would make me nervious dealing with you.

Why would you be nervous dealing with me, you don't even know me? I have completed hundreds of deals over the internet without a problem. Why are you prejudging me without dealing with me?

> If you know
> as much as you suggest, than you should know that no investigation is
> launched unless large amounts of money are involved or a history of

> complaints exist.

That is not true. I deal with the Postal Inspectors on a regular basis as a police officer and they are very cooperative. Local/State police agencies on the other hand will not get involved unless it is thousands and thousands of dollars, and even then we won't get too involved. Extradition is very expensive, but not for the Federal Government.

> Therefore, to hide behind this to justify your
> business practice of accepting only money up front, when you know that
> nothing will be done if the person complains about you (assuming you did
> rip someone off), clearly suggests to me that I would not want to do
> business with you.

I'm not hiding behind anything, if you choose not to do business with me that is your choice. I have never ripped anyone off and have been burnt twice, but I learned after being burnt. Those people have paid for their bad dealings with me, and that is how it should be.

Piero

I have a mint condition FT-1000D which was returned to Yaesu in January of this year. They completely aligned and "updated" it. (They didn't say what "updated" means but I had asked them to bring it up to current specs.

I am asking $2,900 and I will ship UPS surface in the continental USA.

Thanks... Ed, W5EJ

it does it all and at 50 watts. up down mic, quick release mobile mtg. bracket. Great shape, it mobile rig, it has never been pulled in and out of the car, avoiding all the scratching that goes with that. Super extended receive, off the wall offsets if you wish or just regular like everybody else. 220.00 Will consider trade for a shortwave receiver, very narrow vision when it comes to portable receivers, only very top of the lines will be considered.

I have done a few sales on the net thru this group, two the persons sent the money in advance with a postal money order and I sent out the items the same day or the next day.

The one time I sent a Item C.O.D. Via UPS the UPS people lost the payment and I had to wait for over a month to get my money I was not real happy about this.

This is my $0.02 worth.

Ken

Yeah, but you did get your money!

With an unscrupulous person the buyer may never get the item. Unfortunate,
but a fact of life these days.

Only an idiot would send equipment to a stranger without payment in advance.
COD is not a bad way to go...but the buyer will pay all COD charges up
front. I believe in both buyer and seller beware.

Yes there are Millions of "idiots" out there happily buying and
selling pre-paid via U.S. Mail and UPS etc.

C.O.D. has an inherent risk! The guy swho ends you a couple of BRICKS!

It happens more among CB'ers from what I am told.

You can't tell what's in the box until AFTER the UPS guy leaves!
Then it is too late. You have already paid.

There is ALWAYS some measure of risk on the part of buyers and sellers
both.

The best thing is to KNOW YOUR buyer or seller! (as much as possible!)

Rip-offs are rare (as was detailed by one poster on some of the
newsgroups recently)

I wonder why you copied this to SO many newsgroups?

Have you been a victim of a pre-paid scam? I bet less than 0.0001% of
radio trades fail that way.

I have an old topaz 6VDC (input) transmitter power supply
that would be great for a vintage
car ham installation. It's listed on the for sales page at
the link
http://www.geocities.com/SiliconValley/Monitor/4710/

I have zenith wincharger forsale or trade. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. Motor spins freely and it appears to work but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for the shack or other power generating needs Will sell or trade(full or partial) for one(or more) of the items below.

Photos can be seen at
http://www.infinet.com/~gws/windmotor.jpg
http://www.infinet.com/~gws/windvane.jpg
http://www.infinet.com/~gws/windvane2.jpg
http://www.infinet.com/~gws/windvane3.jpg

Will sell for $350 plus shipping or trade full or partial for any of the following items.

repeater community tone panel
2 meter mobile (needs encode pl)
220mhz mobile (needs encode pl)
SOLAR panels and charge controllers.
scanner with cell coverage
mobile HF rig.
Mobile HF antenna system.
440 ham repeater
radio tower (if with 200miles of central ohio).

Other interesting ham gear
Other interesting alterative power gear
Other interesting computer items.

Well...since no one has figured this out yet, I'll be so bold as to offer a summary.

There is almost no completely safe way to do business over the internet with private parties. You ARE TAKING A CHANCE both buying and selling. That's it. eBay is probably one of the safer ways due to the recording of feedback left by buyers and sellers about each other. I have had no bad deals on eBay, but had a very close call with a newsgroup listed piece of equipment. I almost lost $500. Bottom line is...if you don't feel comfortable buying or selling on a newsgroup, then don't. But don't get burned either way and post the fact you were suckered into a deal and it's someone else's fault. Own it and get over it.

I have had plenty of bad deals on Ebay! I bought a watch from a guy with a feedback rating of over 300 (that is alot). The watch didn't work properly and looked used when it was supposed to be new. The seller was very uncooperative and actually told me he couldn't do anything about it even though he stated a 1 year guarantee! Ebay was also less than helpful when I contacted them regarding the seller and replied with a form letter suggesting various courses of action. I have purchased tubes on Ebay as well which were represented to be in much better condition then they actually were. How is Ebay safe if they take no action on the buyers behalf? If you get ripped of on the NG there is always the Postmaster and Mail Fraud which they persue quite agressively.

One more point. If you get a COD package, you won't know what's in it until you open it and you can't open it until you pay for it. It could be filled with bricks.

That's why there is such a thing as escrow for major purchases. Perhaps it would be a good idea to start an escrow company for online deals. It would be more expensive but at least there would be a better chance of neither party getting cheated.

Thank you for reading. I have a couple of GE PLS portables and know very little about them. I am curious how they are programmed, where to locate some batteries for them and and any manuals that might be available for them.

Please reply to khoerz@accessus.net

Thank you.

I have an Eimac 3-1000Z, date code 8718, that has been in my basement
for 10 years or so. It is in an Eimac box, but the box is labeled
8164/3-1000Z. I "eyeballed" the filament connects and it ohms out.
I have no way to test it.

Useful to anyone?

Thanks,

Steve.

FS Kenwood TS690S/AT

160-6M (auto ant tuner through 10M), all mode
1.8 Khz SSB filter
270 Hz CW filter
CTCSS encoder
DTMF mike (as well as original hand mike)
2 DC car power cables
Matching speaker and power supply
I'll throw in a like new Vibroplex paddle and MFJ keyer
All manuals and most original boxes

I am the original owner of this nice HF rig. Spent many nites and weekends enjoying ham radio. I moved to Baltimore into an apartment (from NC) and now just don't have the ambition or time to do covert HF. This is a nice rig, with just some barely noticeable scratches on the top where I laid the ps/speaker. The only other problem I know of is the front speaker jack is not working (didn't have the heart to open the hood - in fact, its never been opened up and I haven't put my hands inside). This would be a great starter HF rig and you get 6M to boot (and can work 6M FM repeaters as set up plus you get SSB/CW on 6 as well).

$750.00 (see ebay and know this is a very reasonable offer considering what you're getting). Package only, I will not split.

Note: pickup only West Baltimore (Owings Mills, MD). I will consider meeting you half way.

TNX DE N4SJW

$650 plus shipping from 71201. Weight 20 pounds

Icom IC-751A HF All Band Transceiver
Serial Number: 39xx

-160 thru 10 meter HF transceiver
-General coverage receiver from 100kHz to 30MHz
-All mode: SSB, FM, AM, CW, & RTTY
-Continuous Duty Operation at 100 watts RF output
-32 tunable memories
-Receiver range: 105dB
-Electronic keyer, semi or full break-in rated to 40 WPM
-Volume control-tracking sidetone
-RF speech processor and tone control to produce sparkling clear audio
-RF power control independent of microphone gain, ALC, and speech
processor

Also includes:
Icom SM-6 desk microphone
Icom original Instruction Manual
Icom original Service Manual

Installed Filters
9 MHz IF
- FL32A (CW/RTTY, 500Hz)
- FL80 (SSB, 2.6kHz)

455kHz IF
- FL44A (SSB, 2.3kHz)

Other Accessories Available (will not be sold before transceiver)

Icom IC-PS30 -- External AC power supply with volt/amp meter, 13.8vDC,
25 Amps. Matches IC-751A in design and color. I will need a power
supply for my new transceiver, so I would prefer to trade for
comparable power supply, such as Astron RS35M.
$100 with transceiver, $125 if separate. Buyer pays shipping via UPS
Ground.

Icom UX-14 -- CI-IV/CI-V Converter for computer control of transceiver
(requires Icom CT-17). A rare item, if you don't know what it is,
chances are you don't need it or wouldn't use it if you had it.

trolling for tail lights. 5 extra points if they go into a skid. I still have my zapper, loads of fun down here on the bottom.

Where do they go?

I talked to the vendor selling the "Zapper." I told him that I thought it was irresponsible and dangerous. There's enough pileups and dead people along the highway without the zapper.

231. FA: Johnson Invader 2000 Transmitter -Rare!

Click on this link for
info -->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=292171193

Johnson Invader 2000 Transmitter -Rare!

E.F. Johnson Invader 2000 transmitter. Note that this is the "2000" model, the high power version, not the more common low power unit.
Condition is good. Front panel is near perfect, but cabinet needs an over spray. Unit is complete except for the connection cable. All tubes on the RF deck have been removed for cleaning and shipping. Tubes will be properly packed and shipped along with the transmitter. Output is CW, SSB and AM! Would make a super addition to that boatanchor collection.

Includes a copy of the manual. The unit is complete and would make a super simple restoration, or parts rig. I have checked the plate transformer and it is working just fine. But with out the cable I am not able to power the unit up. The cable is a simple affair with a male and female plug, seven pin if I recall correctly, which can be readily found at hamfests, or purchased from a parts supplier. I purchased the unit a few months back for a winter restoration project, but at this point I just do not have the time available. Aside from the cosmetic issues mentioned earlier, the unit looks to be in very good condition for its age.

Buyer will be responsible for pickup or shipping costs from Buffalo, NY. Can also deliver to local hamfests in Western New York region. Thanks!

Johnson Invader 2000
Transmitter -Rare! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=
292171193

E.F. Johnson Invader 2000 transmitter. Note that this is the "2000" model, the high power version, not the more common low power unit. Condition is good. Front panel is near perfect, but cabinet needs an over spray. Unit is complete except for the connection cable. All tubes on the RF deck have been removed for cleaning and shipping. Tubes will be properly packed and shipped along with the transmitter. Output is CW, SSB and AM! Would make a super addition to that boatanchor collection.

Includes a copy of the manual. The unit is complete and would make a super simple restoration, or parts rig. I have checked the plate transformer and it is working just fine. But with out the cable I am not able to power the unit up. The cable is a simple affair with a male and female plug, seven pin if I recall correctly, which can be readily found at hamfests, or purchased from a parts supplier. I purchased the unit a few months back for a winter restoration project, but at this point I just do not have the time available. Aside from the cosmetic issues mentioned earlier, the unit looks to be in very good condition for its age.

Buyer will be responsible for pickup or shipping costs from Buffalo, NY. Can also deliver to local hamfests in Western New York region. Thanks!

Knight TR-106 6 Meter Transceiver -Like
New! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293616374

Knight TR-106 6 meter Transceiver in like new condition. I have never seen a cleaner TR106, Absolutely perfect in cosmetic and electrical condition! Comes Complete with Original Operators Manual, Construction/Service Manual, and large Schematic. Also includes the Knight Noise Canceling Microphone. Amplitude Modulation (AM) via plate and screen. Can be either VFO, or Crystal controlled (3 sockets) for TX operation. Receiver uses built in VFO for wide range tuning from 50 to 52 MC. A single 2E26 final offers 15 watts of RF input.

Output network with match a wide range of antennas from 30 to 90 ohms. Can be powered from 120VAC with included power cable, or 12VDC.

A very unique and mint transceiver for the Knight or Boatanchor collector. I have tested the unit personally on my bench and find it works just great!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

Heathkit DX-60B
Transmitter -Mint! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293635395

Here is one of the nicest DX-60B transmitters that I have ever owned! Paintwork and front panel is perfect. I have tested the unit personally on my bench and find it works just great! Offers 90 watts of CW and AM input into a single 6146 final tube. Covers 80,40, 20, 15 and 10-meter bands. Clean units like this one are getting harder and harder to find, it even has the original Heathkit knobs, now that's a change! Has an internal holder for up to 4 crystals or VFO input .Pi output circuit offers wide matching of a variety of antenna impedances.

Comes with a copy of the Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included seveal hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

Heathkit HW-16 CW Transceiver -Very Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293658940

Great moderate power CW rig for home or portable/field use. Runs off 120VAC, but its small size and lightweight make it a nice travel or vacation rig. RF output is 50 to 90 watts, adjustable from the 6GE5 final tube. Grid block keying with automatic antenna switching and receiver muting. Frequency coverage 3.5 to 3.75MHz, 7.0 to 7.25MHz and 21.0 to 21.25 MHz. Uses either Crystals or VFO drive.

In really nice condition, a solid 8.5 out of a scale of 1-10. Has not been hacked up for modified in any way. I have serviced and inspected the rig, replacing the weak tubes, and some resistors that had changed in value. Works like new now!

Comes with the Original Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included several hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

National 183 Receiver -Classic and Nice Too! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293688875

Here is a classic boatanchor receiver, the National 183. These are getting tougher and tougher to find. This one is in very good condition for its age. Works and sounds just super! Coverage from .54 to 31 MC and 48-56 MC Coverage as well! Calibrated band spread for the Amateur bands of 6, 10-11, 20, 40 and 80 meters. Receives both AM and CW with the built-in BFO, can also detect SSB with proper tuning.

Double diode noise limiter and 6 stage Crystal filter work great in noisy and crowded band conditions. The Push-Pull audio, using a pair of 6V6 tubes offers that classic boatanchor sound, with plenty of audio.

I have checked this unit on my bench and I am very happy with it. It does need some very minor cleanup, but would look and work great in any shack right now.

Comes with a great copy of the original manual, complete with service info and schematic!

Buyer to pay for unit in money order or cert. funds within 7 days of end of auction. Buyer will be responsible for shipping from Buffalo, NY 14051 zip code.

Please wait for the hi-res images to load.

Thank you!

National NC-183TS 10" PM Speaker -very
Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293711557

Here is the matching permanent magnet loudspeaker to the National NC-183, NC-183D, NC-183R receiver series. Cabinet and speaker are in very good condition. Sounds just super, especially with the 6V6 Push-Pull Audio Output in the 183 series.

These speakers are hard to come by, especially in condition such as this, so don't miss it!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

If it is for auction on E-Bay 'PLEASE' state so in the Subject i.e.:
FA. Do NOT put in FS: since the equipment is "NOT" for sale but
auction. Most on here don't want to see things that are for action
since E-Bay is a BIG rip-off.

The socket is a SK2A type. It can be found with RF Parts at
www.rfparts.com/sockets.html
or with Svetlana at http://www.svetlana.com/docs/tubeframe.html
or at http://www.surplusales.com/Tubes-Sock-Acc/TubeSktsmain.html (much
cheaper)

You guys that are auctioning stuff, if you're going to auction it then AUCTION it! If you want to list it here, then list it here! If we want to go to ebay, then we will go to Ebay!! The auction often suckers hams and others into buying for almost and sometimes the same price as new which I think is unethical!! The almighty dollar strikes again!! I for one am tired of people puting auction stuff on here!! Anyone else have an opinion??? I thiunk the sysops here should ban this now. Dan L.

I have an opinion -- lighten up! I like to see what is available and it seems reasonable for people to announce items they are auctioning here to let hams know what is available. Ebay is a huge market, and, like it or not, is setting the price for used gear. The newsgroup ad you responded to says FA -- you don't have to read it if you aren't interested in auctions.

I generally agree -- except with the last statement. I've been watching e-bay auctions (admittedly not for long) but it seems that few of the auctions actually result in a transaction, because the reserve prices are not being met. In those cases, I'm not sure you can accurately say that e-bay is setting the price.

It used to be that people only acquired equipment they desired to use, or perhaps the gear that was collected (like collins, or heath, etc.). Now we have a jillion different used equipment brokers who look to buy low and sell high.

Why, I remember the days not too terribly long ago when an elmer might actually give someone a rig to get them started.

In a non-scientific study I made over a period of about 2 weeks less than 4 percent of reserve auctions in the "Ham" catagory did not make reserve. The total reserve price items I monitored was 407 (most were 7 day auctions). 392 made reserve. of the 15 that didn't 5 were canceled before the auction ended. That leaves ten items that had a chance of meeting reserve and didn't.

I did a secondary study (first to admit non-scientific) on shortwave receivers that were in that 407 items. I compared the final ebay price to Fred Osterman's price guide (all editions, including the early editions that had portables in them). I compared a total of 100 ebay receivers to Osterman's prices. Since Osterman gives a "low" and a "high" used price I used the half way price between those two extremes as a comparison. I was surprised to find that over 80 percent of the receivers sold for less than Osterman's suggested value! The one's that did sell for more than Osterman's price usually went for only $20 to $40 more than the middle price. 8 items went for more than the highest Osterman price. Some of those 8 had options that raised the value of the receiver.

And now for the clincher! I go to a lot of ham fests. I kept track of some of the prices I saw at ham fest on certain receivers. (R-71A, Kenwood R-5000, R-2000, R-1000 & any JRC or Drake. Almost all the receivers were priced higher at ham fests than they finaled for on ebay! One exception was the R-2000 which was always cheaper at the fest than on ebay. The one or two JRCs I saw at fests were usually several hundred dollars more than ebays final prices. The same was true of the R71A and R-5000.

But you have to remember several things when reading my numbers. (1) the fests prices were the starting price posted on the radio....usually you can talk it down. (2) ebay radios have postage and insurance you have to add. (3) you can "see" the product at hamfest.

I was shocked to see that in the end ebay was usually the best buy compared to a hamfest!

Since I was looking for some Timewave and JPS filters at the time I paid attention to those also. Believe me, if you
need a timewave or JPS DSP filter buy it on ebay.

Of course my study was half hazard and non scientific with no control factors....and it was on items that interest me. It would be interesting to see a "good" study of prices with documentation to back it up.

I have two Collins mech filters P/N 526 9427 000 .

This is the sideband filter from the KWM-2A. It is meant to be used with
456.35 and 453.65 carrier osc xtals to produce USB and LSB from
balanced carrier.

The filters I have are the later, rectangular, plug in style.

#1 is unused

#2 is attached to the KWM-2A bracket and includes
several assoiated parts

also have two USED xtals (with short leads)

make offer.

289. FS: Lot of BIRD Wattmeter Slugs

Newsgroup: rec.radio.amateur.swap
Date: 2000-04-09 00:00:00 UTC
From: plrjer@visi.net
Message-ID: <38EFF646.A0DCF196@visi.net>
Source record: 7188
Cross-posted to: rec.radio.amateur.equipment,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.cb,sci.electronics.misc

This Lot consists of the following slugs: 1. 25-60 MHz 25W (NEW), 2.
50-125 MHz 50W (USED), 3. 100-250
MHz 50W (NEW), & 4. 200-500 MHz 50W (USED). One of the new slugs has the
letters smeared but I assure
you it is new. The two used slugs are in like new condition. These slugs
come with a money back guarantee less
S&H if you are not satisfied with them. I am asking $175 for all four.
This is about half of what I have in them.
These slugs generally run from $80 to $100 new. Buyer pays $4.50 S&H to
anywhere in Continental U.S. and Canada. Shipping will be via 2-3 Day
Priority Mail. Other methods can be arranged if requested. Payment must
be in the form of a money order or certified/cashier's check.
Please email if you are interested or have any questions.
Thanks in advance!!!

James

$550 for a TS530?????!!!???? I'm curious why so much? I just sold a mint condition Icom IC-728 all band all mode solid state rig for $465. Unless the radio was purchased, then stored unsed for all these years and now being sold as such, I think your asking about $200 too much for the radio.

(Oh my word !)

Grosse Pointe Woods Hamfest cancelled: Gerald Rosner, N8FGK, has announced that Michigan's Grosse Pointe Woods Hamfest, scheduled for Sunday April 16, and sponsored by SEMARA has been cancelled. The Hamfest Committee made the decision based on a lack of advance table sales and dealer participation. SEMARA apologized for any inconvenience.--George Race, WB8BGY

(Must've conflicted with this year's Grosse Point Spring Catillion. I do hope the Mercedes SUVs are still all abloom though !)

I have a VHF HT-600, 6 channel, 5 watt portable for sale. Has brand new battery and will program to your needs. Unit is 146-162 MHz model but can program entire ham band if necessary. Asking $200 or would consider trade for dual band amateur portable. (DJ580/582, TH79, etc.)

GOOD! Ham radio is nothing more than a cheap-ass old white
males hobby anyway in the USA. I just freakin love it when
I see full-page AD's dissappear from ham mags. Let all the
dealers go freakin out of business. Ham radios are built no
different from cheapo VCR's anyway. Anyone who would pay
more than $300 for ANY new piece of ham gear should have his
head examined. So keep droppin like flies you old tightwad
farts. I wanna see page-and-a-half long Obit's in QST.

Is a catillion a party for felines? I never heard of it before your posting.
I think you mean cotillion or in plain words, a fancy dance party and how
that relates to a hamfest is beyond me unless that city is known for it's
swanky swingers and humdingers.

Doc is right.

At least I didn't type it out as Castillian, as some on here with
advanced degrees in ham radio (now possible under the ARRL CEU program)
would have.

Hi all.

Just a reminder, there's just one day left on the ebay auction for a very special Drake R4-C. This unit is an interesting collectors item, having been an in-house engineering prototype at Drake.

Check it out at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=305449161

Thank you, and happy bidding.

Neil

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in
good condition
as removed from military service.

This is a military/commercial quality amplifier that uses a single
4CX3000A to produce
3 KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10
seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would
make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $3,000. unpacked.

I have a few NEW Guaranteed 4CX3000A tubes at $1,000. each

Crating by a professional packer is $350.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site
http://www.columbiaelectronics.com

If you need more info please contact me.

I purchased a CD-ROM covering all 9 volumes of Police Call, 1999 1st edition from Grove Electronics in Feb. 2000 for $34.95 US.

I cannot get the CD to install properly and have had virtually NO support from "Pozilla Software" who is the writer of this data base.

I have made countless calls from Feb. to present with unreturned calls.

So much for their help line and customer care. It is none existent.

Think twice before you throw your money away on this product.

So far it sits gathering dust, totally useless to me. It does NOT function!

Pozilla Software has a great "I don't care about the customer" attitude.

the April 16 news item at this link may explain part of the problem:

Instead of using this as a forum to blast Pozilla, why not try and be a bit more construtive? Personally, I realize this is a relatively immature (in other words "new") product and I would expect a few bugs. (Anyone remember products such as Windows 3.0, WordPerfect 6.0, etc.)

Try to explain the problem you are having with the product and see if someone here may be able to help out. Otherwise, quit griping and enjoy your new paperweight.

http://www.strongsignals.net/pastnews.htm

April 16
I just received the following from Melissa Goldman, wife of
Adam Goldman, President of Pozilla Software:

Adam wanted me to send you an e-mail. He was hospitalized
last Monday with a collapsed lung and the office has been temporarily
closed. While the doctors have released him from the
hospital, he has been ordered to bed rest for a couple of weeks. In the
interim, the
office is closed. If you could release a statement that
the office is closed and why it is closed, that would be very
appreciated. Please let
people know that e-mail will be answered at least once a
day until his health improves. I am doing the best I can to keep things
running
like now, but since I do not have the extensive knowledge
of scanners and the software that my husband has, I am very limited on
what I
can reply to. Please assure everyone that Pozilla is still
around and we will do our best to facilitate our customers.

I'm sure I speak for all of us in the scanner community when I
offer our heartfelt wishes for a fast recovery, Adam! Take care of
yourself and we'll be
here, waiting patiently, when the time comes for you to climb
back in the saddle!

Congratulations to Tony Gargano for taking delivery of a
Japanese version of the Icom IC-R3! Perhaps he will be kind enough to
share his thoughts on
the radio with us over the next, few days. That is if he can
pick up on the manual written in Japanese! ;-)

And yes, today was the day that Strong Signals reached the
1,000,000 hit mark! I want to thank all of you who have helped make this
THE place to
be on the Internet when it comes to radio monitoring! We have
all done a lot to help each other where we can, and I think the results
speak for
themself. Thanks for all your support, and long live the
monitoring hobby!

Body handling: HTML body converted to readable text

Call your credit card company and have them remove the charge and get
your money back for you. The merchants are bound for 6 months after a
sale by contract that the credit card issuer can take back thier money
right out of the merchants bank account.

Since you can't get any use out of the disk, your liability for paying
for the merchandice would theoreticly be the value of the plastic and
the cardboard of the disk and box.

Stick it to them, and get your money back the hard way, and thenlet them
all go pound sand!

Excellent condition TS-700A 2mtr all mode rig. All solid state. Complete with original hand mic and original service manual (all schematics and parts lists), including update bulletins. Radio has 2 crystals added for .12 and .52 in the fixed positions (9 more open). Have operated in all modes and radio works perfectly. This model also has AM mode.

Sell for $300 or would consider trades for dual band mobiles such as DR610 or FT8100/8500. Would also consider trade for Kodak DC-120 digital camera.

I've got 1/2 of a Drake C-line, and need an R4-C and MS-4 to finish it up. The details:

R4-C: Must be 5-position mode switch. I don't care if it has Sherwood or other mods, but must not be butchered. Filters and crystals a plus, but not required. Most important is that it be cosmetically very good, and with a minimum of corrosion on the chassis. Also must be complete, no missing parts please.

MS-4: Condition not that important, except must not be dented. Also, must have normal Drake MS-4 label in the front, and speaker must be ok. I don't need a power supply.

Please respond with price and condition to NeilR@innermedia.com, or you can call me at (603) 465-2788, or (yes toll-free) 800-962-2949

Thanks, and best 73's all.

For sale amateur radio equipment:

Kenwood TS-450sat in pristine condition. Includes 500khz CW filter. This unit was little used (2 QSOs in all of 1999, 3 in 1998 and only 1 in 1997, none in 2000) and has never been mobile. All boxes and manuals are included.

Pyramid 30amp AC power supply for the Kenwood. Manual included.

MFJ 407b keyer and homemade 'squeeze' key. Manual included for the keyer.

MFJ 1704 coax switch. Manual included.

I will NOT split up this package. Asking $800 for all and you pay shipping. Pickup in north Cincinnati area, just 50 miles south of Dayton hamvention. This is the most perfect ham rig I've had in almost 40 years, but the interest has left me. So I think it's time to part with it. EMAIL if interested.

Yaesu FT-5100 VHF/UHF Mobile

Excellent dual band rig. Original owner. Condition 8 of 10 (band switch lettering is rubbing off, some slight scuff marks on top). High power (50w on 146 MHz, 35w on 440 MHz). 80+ memory channels in two banks per band. Full crossband repeat capability. Dual in-band receive (V, U), Built in duplexer. Box, manual, TT microphone.

AES and HRO price used at $350, aade lists ebay prices at average of $290, high of $350, AF4K lists one transaction at $400. I'm asking $275 plus shipping.

Very late production model s/n (001xxxx), mfg. Jan 1988. Two brand new Inrad CW filters (400Hz) one for each IF stage ($250 value). IF-10B computer interface installed and W1GEE computer interface cable included ($125 value). Built-in antenna tuner option installed. Excellent condition (9 of 10), original manual. Reason for sale: already have two other HF rigs, this one takes up more space than I can allow (but is by far the best performing rig I own!)

US$1,100 plus shipping.

Email to <my callsign> at arrl.net or <my callsign> @ midsouth.rr.com for quicker response.

Delivery within 250 miles of Memphis, Tennessee, can be arranged.

Thanks,
Marty N5NW

Actually, less. If I remember correctly, when the FCC moved to 40 channels, the tightened the spec for type acceptance. 23 channel radios could be continued to be used by their current owner but no-longer could be sold, new OR used. This was force method to phase the older radios out of existence. But we know how enforcement goes.

Hello Everyone,

I am looking for QST magazines -- in decent shape -- from *at
the latest* the 1970's for a collection. I'm especially interested in
any issues prior to the 70's!

If you are looking to get rid of your box of QST's, I'll be
happy to reimburse for shipping and/or a reasonable cost for the
magazines.

Please email direct. Thanks!

73,
Brian, N5ZGT

This is a great scanner and general coverage radio.
It receives continuos coverage from 100 Khz to 2 Ghz (including cell
bands).
It is in need of a minor repair. The crystal needs to be resoldiered to
the circuit board.
I could do it myself. But, I am too afraid that I will ruin it.
I have software for it to work with a Mac.

Yaesu FT-2200 2 meter transceiver with extra power cable, excellent condition (if a 10 is new, this unit is a 9.5). Boxes, manuals and auto mounting bracket is included. Unit has extended receive (140-175 mhz.) and transmits 50/25/5 watts output. I will include a Phase III AC power supply (13.8 volts at 12 amps). You pay shipping. Price $150. EMAIL if interested.

I have a yaezu ft-101ex that I would like to sell or trade. Radio recieves well, transmit is low, could be tubes could be something else. I just want a backup radio and I don't want to put money in to it. MMake me an offer, I will considder trade with cash if you would like, just something for a backup radio, a ts130 or something, even a 2950 if the deal is right. Email n1umj@mediaone if you might be interested. The radio is a backup and I don't want to put any money in to a backup radio especially where my main radio is so reliable, I just want a backup just incase. thanks,

Well this is all that remains and it ALL has to go, so drop me a line if the price seems out of line. I'll even through in the shipping and insurance state side if the offer is good :)

Radio Shack HTX-212 2m mobile I give it a 7 as there are some minor surface scratches on the case. $125 obo

TrippLite PR-12 power supply, mint, very nice unit. $60 obo

MFJ-407C Deluxe Electronic Keyer, mint, bought but never got around to going for the code test. $50 obo

Bencher BY-1 paddles, same story as keyer $50 obo

Cobra 2000 GTL w/ extra speaker. With original box and mic. Also has D104 deskmike. Yes it does have the extra freqs and clarifier mod. $250 obo

Source record: 7041
Cross-posted to: rec.radio.swap,alt.ham-radio.marketplace,rec.radio.amateur.swap,rec.ham-radio.swap

It's time for me to upgrade the computers in my ham shack from 486 to
pentium so I'm looking for several motherboards with CPUs and optionally,
memory.

This is what I'd like:

well known boards like ASUS or others.
P166 or better chip
On board I/O including FDC/HDC, Serial and parallel, USB, IR connector
that is IRDA compliant.
ISA/PCI slots min of three each. (alternately, all PCI slots)
Must have the manuals for the board or be avallible on-line.

Board style may be AT or ATX.

I don't want boards with on-board video or sound cards. SCSI controllers
are ok, as is on-board ethernet.

Also, I would consider purchasing other components such as hard drives,
video and sound cards, and memory on an individual basis.

I would prefer to pay cash for such items but do have some items to trade.
Mostly, they are components- trimmer caps, twinax-coax, misc other items.

Please e-mail me with the manufacturer and the model number of the board,
the CPU manufacturer, model and speed. Include an asking price.

e-mail ghopper@eskimo.com

For sale a near perfect Kenwood TS450-SAT with antenna tuner and 500 khz. cw filter. The unit includes all boxes and manuals.
Also included is a Pyramid 30 amp AC power supply, MFJ 407b keyer and homemade squeeze key and MFJ 1704 coax switch. All manuals or data sheets included with this equipment.
The Kenwood has never been mobile and I am not a smoker. If a 10 is new and still in the box, this unit is a 9.5.
I will not break up this equipment. Price is $800 and you pay shipping.

I'm interested in the 30L1, but I'd fly to pick it up in person...Cash!
If you are within 80-1200 miles of central Michigan.

The only way I purchase these kinds of items on the net is to see them and
pay cash in person.

I do not in any way shape of form buy though e-bay.

Hi all,

I have a Mirage D15 440 amp. This unit has developed a short and I do not have the manual. I bought it used . I need a schematic for this unit so maybe I can try to repair it. Anyone have one?

Thanks

I have an OLD Collins filter catalog which lists them, but there are several versions of each. There are none ending in 000, however if they end in 00 then they should be 2.7kHz at 3dB long type Y. The catalog I found them in uses kc instead of kHz so you can guess how old it is!

Long type Y are 7/16" dia. and 2 1/2" long not including three solder tabs on each end.

If they don't end in 00 then there are various bandwidths and case styles but I only have data for 011, 021, 031 and 041.

Hope this helps.

Dave

I have a retail, non-upgrade, full version legal copy of office 2000 premium. I would like to trade it for a nice shortwave radio.

E-mail me with what you have and I will consider all offers before making a decision.

This is the package that contains Excel, Word, Powerpoint, Frontpage, Access, publisher and Photodraw !

Here is a link that shows the internet price of $680 and an overview of the program

Kenwood TS-850SAT for sale.
It is in excellent condition both physically and electrically.
50 mil. serial number.
Clean in every way and works great. No scratch or ding.
It comes with MC-60 desk microphone but no hand mic, boxes, or filters.
It also comes with original manual.
Reason for selling is that I decided to stick with older radios that I
have and I don't use it much these days due to family matter.
Price is $825 (in USD) plus actual shipping cost by UPS (around $35 for
most locations).

Kenwood TS-850SAT for sale.
It is in excellent condition both physically and electrically. Auto
tuner works great.
50 mil. serial number. Clean and works great. No scratch or ding.
Just a couple of small and fine pen marks on the option bay door. Front
is in perfect condition.
It comes with MC-60 desk microphone which is also in near mint
condition,
but no hand mic, boxes, or filters.
It also comes with original manual.
Price is $825 (in USD) plus actual shipping cost by UPS (around $35 for
most locations in North America).

I would avoid this unit like the plague.

If the poster can't be honest enough to post that it's "for auction"
instead of the 'for sale' how honest do you think the condition
of the equipment will be?

I have an ft-101ex I would love to sell or trade. I don't know what it is worth, the AM recieve is a little low, and the transmit power is a little low, but I think that is nothing big, i think anyone who knows the radio can fix it easy. I would like to trade, possibly with cash for a radio I might be able to use for a backup rig, maybe even something else with minor problem/s If interested, email me at n1umj@mediaone.net thanks, and 73
John

I have a Tempo One that has been taking up space in my basement. The rig works but does need some alignment. It is the Silver face model. covers 80-10 including 11meters. It was the first HF rig I owned and will make a nice starter rig just needs some TLC. I will sell it for $125.00 or best offer or maybe trade for a decent 2meter or dualband HT.
Email to rellison@twcny.rr.com if intrested.

I have an ft-101ex I would like to sell or trade. The AM recieve is a little low, and the power on 10 meters and possibly some other bands is a little low but the ssb, and cw recieve is perfect, and I think a new driver, and maybe an alinement and the radio would be all set. I will considder trade with cash for a solid-state hf radio that might make a decent backup radio, or, if you make me an offer, more then likely if it isn't rediculas, I will considder it. I have with the radio, a sure 444 mic, very banged up, but works fine. Email me if interested at n1umj@mediaone.net

For sale a near perfect Kenwood TS450-SAT with antenna tuner and 500 khz. cw filter. The unit includes all boxes and manuals.
Also included is a Pyramid 30 amp AC power supply, MFJ 407b keyer and homemade squeeze key and MFJ 1704 coax switch. All manuals or data sheets included with this equipment.
The Kenwood has never been mobile and I am not a smoker. If a 10 is new and still in the box, this unit is a 9.5.
I will not break up this equipment. Price is $800 shipped to your door.

Hi all;

Looking for a single paddle morse paddle, same as or similar to
Hi-Mound model MK-704. I don't want an iambic (double) paddle,
please. This is for my own use, I am NOT a collector. No-name,
no-brand is fine, but must be good quality/condition.

What do you have?

Please contact:

Larry, K1CWZ at l.spinak@spikraft.mv.com

or call (603) 889-0908

Thanks, and 73

==========
Hi Larry -- I have a Kent single paddle brass key. Tis tarnished as
brass does. The plastic paddle part broke and I replaced it with a like
size PC board material -- won't break for sure. Otherwise -- nice
condition. Reason for selling -- someone sold me a single paddle Bencher
for a nice price -- which I use now.

Make me an offer on the Kent.
New price is PL-PK103 KENT SINGLE PADDLE

I'm looking to buy a Drake MS-7 speaker.

Here's how to contact me:

Neil, N1DMA
(603) 465-2788
or (800) 962-2949

or via email at NeilR@innermedia.com

The speaker need not be pristine, but must work. Sticky paint ok.

Thanks.

Neil

For sale:

1. Heath HM102 HF SWR/power meters. Have 2, both working.
#1 looks good, no mods. $30 plus shipping. #2 has cracked
meter face and has an added switch on FP to switch from
set to read on SWR. $20 plus shipping. Both with repro
manual.

2. VIC20 RTTY outfit. 3 VIC 20 computers. 2 work, 1 parts
(may work), 2 power supplies. VIC books. MFJ 1234 RTTY
terminal, MFJ cartridge software for VIC 20 (RTTY/ASCII/CW)
and cables for 1234. AIR cartridge software (rtty/AMTOR/CW)
for VIC 20 and cables for 1234. MFJ software for 1234 for
DOS computer and serial cable.
Sell as a set only. $100 plus shipping.

Also have a Sears 13" B&W tv/composite monitor to go with it.
$20 plus shipping.

3. "antenna tuner" parts I would like to sell as a "set" rather than
one at a time.

Cardwell 154-2 variable capacitors, 2 each
15-353 pF, 2kV, Used, short shafts, good condition.

EF Johnson 229-203 roller inductor 28 uH
Used, good condition.

B+W Miniductor #2410T 3" x 10" 10 TPI
200 uH New Old Stock but first 3 or 4 turns from
each end have been bent.. although they have
been bent back close to shape.

$150 shipped for "set"

Prices for the "set" new at Surplus Sales of N
would be over $300.

4. Xtal for KWM-2/2A 15.9775Mhz dial freq 28.8 to 29.0
Mhz ,$8 shipped.

Purchased new four years ago with brand new tubes, original manual, good quality microphone. Used it for a year for 1-2 hours a night, but have since moved into an apartment and it's been in disuse for about three years now.

I hate to sell it as it's a great radio, made a *lot* of contacts on it.. But I don't see being able to use it any time soon, so it must go.

Radio is in very good condition, works flawlessly, case is in perfect condition. I can take lots of pictures and put them on my webpage for inspection.

Thanks!

All the bells/whistles -- including 440 MHz. Great 6m radio, high
power on 2m.

Purchased new less than three months ago. Less than 10 hours operating
25% duty cycle. Traveled to Albania with me, and I don't need it since
returning. Like new with all documentation and box. I paid $960 at
Texas Towers, asking $875 including shipping continental US.

For quick response, reply to my callsign @ arrl.net.

Hello,

I have an ICOM IC-R10 that I want to swap for for a nice laptop.

The radio is in very good condition. It is full coverage (no cell block) and comes with two antennas, case, charger and manual. If you don't know the specs on the R10, email me.

The laptop has to have a CD-ROM drive. If it is very nice, I am willing to add a little cash to the deal.

I am looking for two Drake TR-7 Accessories:

1. MS-7 Speaker

2. RV-75 Remote VFO

If you have either/both please email to NeilR@innermedia.com or call
(800) 962-2949 or (603) 465-2788

No junk please.

Thanks.

Neil, N1DMA

555. FS: Icom IC-03AT

Newsgroup: rec.radio.amateur.swap
Date: 2000-07-06 00:00:00 UTC
From: ghopper@eskimo.com
Message-ID: <ghopper-0607002342400001@07-155.009.popsite.net>
Source record: 6854
Cross-posted to:
rec.radio.swap,alt.ham-radio.marketplace,rec.radio.amateur.swap,rec.ham-radio.swap,rec.radio.amateur.equipment

Icom IC-03AT

Includes: Radio, antenna,(2)BP-3 batteries, wall charger and copy of
manual.

$180.00 including insurance and priority shipping to your door in the lower 48.

The radio is in good to good very condition (some wear from use but
nothing more than very minor cosmetic wear) One battery holds a charge but
it is not in "new" condition by any means. I get close to a full day's use
out of it. Battery two seems to be at the end of its life but these
battery cases can be opened without destroying them and new cells replaced
for the old ones.

I'll thrown a non-icom hand mic that was included when I bought the radio,
but I never used. I am selling the radio because I just got a mobile 220
that serves the purpose the HT filled before. Also, I have a copy of the
manual and I thought I had the original but it isn't in its file and no
where in the shack. If I find it, I'll include it (even if it's after the
sale.)

I can provide a picture for interested parties.

Payment via cashier's check or postal money order. The radio will be
shipped the day I get payment.

For the price police: Yes, I know that there are other newer 220Mhz radios
out there. But really have you looked at the construction or what you get
for your money?

email if interested

A lot of Jerrold SLM's were built by Sadelco in Sadlebrook, NJ. They
had the Jerrold name on them, but the insides were the same as my
Sadelco meter.

I have a question and for all of your Motorola Fans. Will a VHF Micor be able to accept Alphanumeric paging information and transmit it without errors? I have been told that although it is direct fm modulation in the transmitter exciter, it might not be able to handle the Alphanumeric information. Is there any modification that can be done to correct the problem, if there is a problem? Please reply via email. Thanks Don Smith KB6GQA

I have for sale or trade the following Drake items:

Drake TR4C Transceiver and AC-4/MS-4 speaker and power supply.
Excellent
condition cosmetically. Needs an alignment for full power out above
40M.
Original manual. Asking $325.

Drake R4/T4x Receiver and Transmitter with MS-4 speaker and AC-3 power
supply.
Used regularly and gets very good signal reports. Previous owner
repainted
with a glossy black paint, so you'd have to respray them with the
correct gray
paint to restore to original condition. Excellent condition
electronically.
Asking $325.

Icom IC-T7A 2m/440 HT with charger, manual,
new battery, original packing , receipt, and warranty card from when I
bought it new in 1997. The radio needs a new channel selector knob and
the speaker is a little raspy, so I suspect it needs to be replaced,
also. Cost for new parts will be under $15. Asking $140.

I'd take cash for the items listed above or would swap for any of the
following:

Yaesu 5400 AZ/EL antenna rotator
Swan 500 & PS
Swan 700 & PS
AEA PK-1232 or 2232 TNC
Icom IC-820/821
Kenwood TM-V7A
Kenwood TH-78A or TH-79
Heathkit SB-104A
Kenwood TS-830s

Please respond via email to jcamp2@home.com.

MFJ 949E Delux Versa Tuner II. This unit isn't "just like new", it is new! 6 months old. It works as advertised and works well! I was given a MINT linear amp and this tuner only can handle 300 watts. I need to upgrade. I am so impressed with this MFJ unit that I am upgrading to their MFJ-962C 1.5 KW Versa Tuner III. Specs on this tuner can be found at http://www.mfjenterprises.com/tuners/mfj949e.html Buyer pays shipping w/insurance. US Certified Funds or US Money Orders Only.

Shure Desktop Amplified Microphone model # 526T Almost new condition. In fact, I just replaced the Mic Crystal and went over the amp circuit with a fine tooth comb. This mic is wired for a 4 pin Yaesu radio. I have had great audio reports with this mic. I now longer have a use for this mic as I am trimming down gear that is gathering dust. This mic was last used with the Yaesu FT301 D that I currently have on eBay. Will work with any 4 pin mic input. Buyer pays shipping w/insurance. US Certified Funds or US Money Orders only.

Yaesu FT301D TRANSCEIVER 10 - 160 meters. LSB, USB, CW, AM, FSK. SSB - 200 Watts. CW 200 Watts. AM, FSK - 50 watts. This HF unit was recently returned from Yaesu USA. I sent it off to have it tuned up and aligned so I could put it up for auction. Radio is within all Factory Specs. GREAT FOR NEW GERNERAL or OLD EXTRA! I hooked it up and connected to it a dipole and made 3 contacts with 3 attempts on 20 meters. Radio is putting out a little over 180 watts on 20 meters USB and 50 on AM. (on a home made dipole ant) Although this radio is aged a bit, I always thought it had one of the better front end receivers of all the Yaesu's. It's reception is even a bit better than on my new FT840. Radio operates on 12 VDC. Needs a power supply or use as Mobile. Comes with factory Hand Held Mic and a Photo Copy of the Operating Manual with Schematics. US Certified Funds or Money Order Only. Buyer pays shipping. Unit ships at 32 pounds.

Greg,

I am posting the email I just sent you on this and appologise to all on this matter. The specs on this radio do indeed say 200 watts input SSB. The readings I am getting are from a NEW MFJ 949 and an older Radio shack meter. Both are showing needle peaks around 180 watts. This could be from ballistics.

But to clarify the post, this radio was certified by Yaesu this month to be within or above all factory specs. I can a copy of this letter from Yaesu to anyone who whould be interested.

Thanks, and again, I am sorry for any misunderstandings this post may have caused.

MD

Greg,

You may be correct but my MFJ 949 and a cheaper radio shack meter are both showing this radio to be peaking the needle at 180 watts. It may be due to ballistics.

I will place another post to clarify this.

Thanks for the information

Hello fellow usenet denizens...

I was lucky enough to find a well-operating Hickok 6000 tube tester,
but I have no schematic for it.

I'll pay your copying cost, travel and postage if anyone would be
kind enough to make a readable copy of the schematic for me.

Please respond via phone, or email to NeilR@innermedia.com

My address;

Beware of this auction and seller. After I won a bid for 20 feet, the seller refused to sell me unless I buy at least 50 feet or wait such length is available. In the auction I bid on, the seller did not place any requirement on minimal length to purchase. I think per E-bay rule, the seller is obliged to sell but he/she does not care.

I have 1 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 modual just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for them. RF parts wants around $70.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

I have tossed together a web page which attempts to provide a
step-by-step guide to converting the Heath SB-220/221 amplifiers over
to 6 meter only operation. There are pictures (such as they are)
included to clarify the procedure.

If this should interest you, please go to
www.agate.net/~ns1z/sb220.html
and look it over. Should you have suggestions on improving this
reference, I would appreciate hearing from you. Like antenna work, a
web page is never done......

If you use my page to do a conversion, let me know how you make out.

Have Fun!

NS1Z FN44rn (for those of you with ICBM capability.....)

Besides an interesting collectable, these are useful for wind position
and speed sensors, ham antenna position reporting, and legacy industrial
uses.
Can be run on 60 Hertz 12 volts AC if you lightly sense your outputs
with a PIC or whatever

Please see tutorials and details at

I have 1 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 modual just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for them. RF parts wants around $70.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap

The following equipment is for sale. Please respond directly to Joe Nunimaker, KD3VR at bmejoe@juno.com or call him at 301-577-3749. He does NOT have access to this Newsgroup. Thanks.

Item 1):
2 Micor, solid state, 100 watt continuous duty repeater/base stations. 2 channel transmit and receive. Carrier squelch and private line, tone coded squelch, digital voice protection. Motorola C73RXB-1126B, date code of October 1988. Absolutely mint condition. Guaranteed to be completely operational.

These units have consecutive serial numbers. Both units are identical except one unit has a receiver board model TLD5781AV, which covers 132-142mhz. This receiver board will cover the 2 meter band without modification. All other boards are exactly the same in both units. The units are configured as remote bases, so they will need to be rewired as repeaters, if that is the intent of their use. This is easily done with the manual. Asking $895 each. Pick up only please from Maryland just outside of Washington DC.

Item 2):
CAI, commercial marine band, 2-30 mhz. 1 KW, continuous duty HF transceiver. The exciter unit is in a 19 X 22 inch equipment cabinet, is diode programmable and has 150 watts of output. The PA unit is in a 19 inch X 4 foot, roll around equipment cabinet. The PA unit uses an 8877 ceramic tube. The unit could be converted for the amateur bands by someone with some electronic experience. It is in working condition and can be seen in operation before purchase. Asking $500. Pick up only please.

3):
One (1) Eimac 8877 ceramic tube. Unknown age but can supply serial number. Will guarantee the tube to be in good operating condition and will make rated output power. Asking 450, plus shipping.

73 Thanks
Joe Nunimaker, KD3VR

5 Aug 2000 23:59:33 GMT

It's hard for me to believe that the next president of the United States will be George W. Bush or Al Gore. Both remind me of Hollywood movies that have been focus-grouped to death: they push all the appropriate buttons, but have zero original vision. Both stand for the same thing: corporate-driven business as usual.

There must be some way outta here.

Ralph Nader is no joker or thief. I think he and the Greens could give Al & George a good run for their money. At 65, Nader isn't running as fast as he used to, and the Green Party doesn't exactly have its platform figured out, but I think they have what it takes to inject a dose of radical democracy into the race. Unlike the two Tweedles, Nader is real, he stands for decency and common sense and he still commands a lot of respect in progressive and activist circles. And hidden behind the rainbow coalition of lefties, eco-feminists and crazies, the Green Party does have some great ideas. It's the only party that stands for the Tobin Tax, true cost markets, media reform and putting corporations in their place.

In October, with a fired-up Nader hurling intelligent sound bites into the presidential debates, the whole game show might actually be worth watching. The alternative is the most sophomoric presidential race in American history . . . and the lowest voter turnout ever.

I'm putting a GO GREEN - VOTE NADER graphic at the end of all my emails from now on. I'm betting that, between now and November, the American people will wake up to the fact that their sacred democratic experiment has now degenerated into a choice between a corporate-sponsored Republican and a corporate-sponsored Democrat.

In these heady post-WTO days, a sudden, massive protest vote against Al & George is entirely possible and Nader would be the most apparent heir. With perhaps less than 25 percent of the people voting, an inspired Nader campaign could grab a surprising share of the action. And even if he does not come close to winning, at least imagine how his campaign might pull together some of the fired-up, post-WTO forces and lay the groundwork for something really visionary in 2004.

Download the graphics and help launch an email pyramid scheme to dump the Tweedles! Two formats are available, a magazine

sticker (17K) or a Banner ad (5K):

==========

What it Means to be Green

"At the root of all Green political action is nonviolence, starting with how we live our lives, taking small, unilateral steps toward peace in everything we do. Green politics requires us to be both tender and subversive. Affirming tenderness as a political value is already subversive. In Green politics, we practice tenderness in relations with others; in caring for ideas, art, language, and culture; and in cherishing and protecting the Earth. To think Green is to build solidarity with those working for social justice and human rights everywhere, not bound by ideologies."

-Petra Kelly

Source record: 6841
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I am currently selling my Yaesu FT-50R on ebay.

The unit is in perfect condition except for the antenna, which has a slight (but very insignificant) 'curve' bent into it from brushing up along side my body. This is incredibly slight, but I like to be honest :-)

The package includes:
- The Yaesu FT-50 in incredible condition
- The Yaesu MH-34 Speaker Mic
- A rubber grommet for protecting the radio (it worked well!)

The following batteries:
1 - FNB-41* (Manufacture: Yaesu) 9.6v 600mAh [NiCad]
2 - MH-FNB-41 (Manufacture: MAHA) 9.6v 900mAh [NiMH]
1 - MH-FNB-40H (Manufacture: MAHA) 7.2v 650mAh [NiMH]
1 - PR-FNB-V47 (Manufacture: PR?) 7.2v 1200mAh [NiCad]

The FNB-41 is "bad" and needs the cells replaced or sparked. The PR-FNB-V47
is practically brand new.

I am also including the Maha MH-C777 battery charger with this radio.

I am asking $250 for the entire package. You will not be disappointed. The radio was modified, but I am unaware of the range of tx/rx.

For more information, or to make a bid on this radio, please visit the following
auction on ebay:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=405006165

I have 1 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 modual just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for them. RF parts wants around $70.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

This is my own one-owner/nonsmoker Alpha 87A, serial #91190053. It is in absolutely top-notch (9.5 out of 10) condition cosmetically and electronically. It comes with the original manual (clean; pages encased in plastic) and all schematics. It works perfectly (NEVER a problem of ANY KIND), delivers full output, and is ready to plug in and go with any transceiver. Selling because I have never used it very much, and have an Icom PW1 to use with my IC-775. You'll be getting a REALLY FINE amp. Price is $3,995 + shipping/insurance FIRM. See my ebay feedback (swanman3) if you have any doubts. Tks es 73!

Hi all,

I have reproduced the diode boards for the Classic Collins 30L-1. If you have a 30L-1 and it has the original 1N1492 top hat diodes in it, you probably need one of these boards. Out of the seven amps I checked out, five of them had at least two shorted diodes. These new boards are just like the original in that all components are placed just where they are on the original. This board is extremely high quality and will live up to the Collins standards. All components are either NOS or NEW. The 16 rectifier diodes have been upgraded to new 1N5408's (3 Amp, 1000 volt PIV) made either by Motorola (now ON Semiconductor), or by Vishay. The 16 ceramic capacitors are 1KV ceramic disks made in the USA by Sprague. The 1500 Ohm resistor is a genuine Carbon Composition 2W 5% Allen Bradley! The 4 Meg 2W, 1% metal film resistor is a genuine Dale, and the 1 Ohm 5W 1% is either a Dale or Pacific NOS mil spec resistor or when these run out, it will be a New Ohmite brand. All assembly is being done by a NASA certified solderer. I have used the best components I could buy and hired the best assembler I could find. I wanted this board to be truely Collins Quality. A photo (not a very good one however) can be seen at http://members.aol.com/dw130/diode1.jpg If you would like to place an order for one or more of these boards they are $79.00 each + $4.50 total shipping in US (no matter how many boards you order). If overseas, shipping will be actual cost. Please send to:

Rod Murray (K1ROD)
17 Shelly Drive
Derry, NH 03038
USA

I also accept Paypal at dw130@mediaone.net
If you would like feedback about how I conduct business please see my ebay id k1rod

Thanks and 73'

690. FS: 220 MHz power modules type M68729 30 W out for 300mW in

I have 1 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 modual just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for them. RF parts wants around $70.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

Gun owners beware!

Senate Bill SB-2099 will require us to put on our 2000 1040 federal tax Form all guns that you have or own. It may require fingerprints and a tax of $50 per gun. This bill was introduced on Feb. 24. This bill will

become public knowledge 30 days after it is voted into law. This is an amendment to the Internal Revenue Act of 1986. This means that the Finance Committee can pass this without the Senate voting on it at all. The full text of the proposed amendment is on the U.S. Senate homepage. http://www.senate.gov/ You can find the bill by doing a search by the bill number. (SB-2099) Use the complete "SB-2099".
You know who to call; I strongly suggest you do. Please send a copy of this e-mail to every gun owner you know to help STOP this bill!!

This is false. ALL amendments to bills/acts must be voted on by both the
Senate and House, as well as being signed by the President.

If it was introduced in February, it is far too late to do anything about
it now. It has either been passed (highly unlikely) or dropped.

Bill,

If it is FALSE, go to the web site and look it up for yourself!

John

Thank you for reading my message today.

I can not remember the e-mail address for a list server I was on from Sanford University. Too many HDD crashes I guess. If you know the e-mail of the W6(YZ@stanford.edu?) Mail list please forward that address to me please. I would like to say my good bye's to those on that listserver as well.

Name here is Michael David Hiltner
Call is VE3VRQ (AKA: CF3VRQ), No doubt, I have QSL'd with many on 2m & 6m SSB!
Grid is FN13gx

I will be departing for Saudi Arabia on the 20th of this month, and have been notified that I will not be able to bring over any of my radio equipment into the country.

Since I will be there for 5 years, I have decided to liquidate my Amateur Radio Equipment Holdings. There is one station for intl radio users (about 300km from where I will be stationed), I intend to visit this QTH as much as possible.

Remember These items WILL be sold to the BEST OFFERED PRICE. There are only 18 days prior to my departure, so please Print &/or FWD this message to as many Radio Amateurs you know to get the widest exposure. Time is of the utmost importance. Do NOT hessitate on this offer! They WILL be gone before too long.

Items:

o Yaesu FT221r 2m
o Yaesu FT736r 2m / 440cm
o Mirage A1015g 100w 6m Amp
o GC Electronics 6m SWR & Power Meter
o General Electric (Shure Brothers) mic w/ 600ohm mic modification (This is what gave me my crystal clear transmitions on both my FT221r & FT736r!).

Buyer assumes the responsability for shipment / insurance of all of the above items.

Mailing address for your cheque:

Michael David Hiltner
VE3VRQ
18993 Loyalist Parkway

R.R.#3 Consecon, Ontario
K0K 1T0
Canada

Thank you kindly for your time & QSO's! I have enjoyed each and every opening I have been able to muster!

73 my friends! de, VE3VRQ, Michael

Mine literally caught fire! was gabbing on 2 meters when the car filled up with smoke. Yaesu made good on it. It seems that a voltage regulator shorted, placing full 12 volts on the entire radio. I was lucky I didn't lose the car as the self tapping screws that held the radio to the plastic ducting under the dash melted out of the dash and it fell on the floor. Yaesu was VERY VERY responsible about this. Just DO NOT under any case put this radio under the seat or in a glove box or anywhere else confined..... The plastic end pieces melted, the external speaker plug melted,the VHF final was burned beyond recognition. The plastic piece that holds the power cable in the case melted, the heavy black and red cables became bare. The factory fuse FINALLY blew by the time I got pulled off the road and over to the passenger side of the vehicle.Had to get a rag to remove the chassis from the car as it was melting the floormat (Nylon).....Kirk

I have 5 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 module just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for each of them them. RF parts wants around $70.00 for the same.
I will sell them all for $200, this is the equivalent of getting one for free.

These are brand new never been used and still have the one inch leads on them. I have 4 of them in a sealed rack and one loose.

Thank You,

Bryan Fields, KB9MCI

For Sale:

Perth "OutRunner" 10M-160M mobile antenna, I don't think it's ever been used. $275.00

Kenwood TM-733A dual band mobile, with remote mounting bracket. Very good condition, just back from AVVID for repair/alignment (turned out there was a problem in the mic cord and not the radio). $325.00

Kenwood TR-751A 2M All mode. Good condition. Up/Dn buttons on mic do not work (suspect cable again). $300.

Peter W. Dahl Plate xformer, 1250V @ 1.5A CCS - This is a large xformer and would really prefer someone within a couple of hours driving from Burlington, VT. $225.

LDG DWM-4 Digital Wattmeter with HF/QRP and VHF/UHF sensors. $90.00

MFJ-101 24hr Digital Clock. $20.00

Ten-Tec 1208 2M to 6M Transverter (needs final alignment, I don't have a 6M source). $70.00

Prices do not include shipping. E-mail direct if interested.

776. manual for a Force 12 EF320X240S

Newsgroup: rec.radio.amateur.swap
Date: 2000-09-13 00:00:00 UTC
From: Jeff/kb2wqm <kb2wqm@amsat.org>
Message-ID: <39c01b22@news.dandy.net>
Source record: 6686
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

I need a copy of the manual for a Force 12 EF 320X240S I just picked up in a used tower, and got the Force 12 as part of the buy. Anyone who has this antenna care to zerox a copy of the manual for me? I will send a self addressed stamped envelope. I also would consider selling the antenna, if anyone is interested.

73 Jeff kb2wqm

IC-735 with 500 Hz CW filter and including Icom SM-6 desk mic (mic is about $100 value). Excellent condition -- plastic door intact. Manual included. Very clean, some wear on top, but no scratches. Asking $550 plus shipping. Radio alone (no microphone) for $500 plus shipping.

Will consider trade for color laptop, Pentium 233 or better, CD-ROM, 1.0GB or better hard disk, TFT color screen, 64 meg memory, modem, PCMCIA slot, USB ports.

email to my callsign at arrl.net or my callsign at midsouth.rr.com for prompt response. All reasonable offers considered.

I am deeply disappointed to warn you not to deal with Warren Brooks W4WWB. He advertised a radio on ebay that was complete, but needed some work. What arrived was a parts radio - Pieces were missing and it will not power up. After he ignored my emails I contacted him by phone and in his best good ole boy drawl he told me " you bought it, you own it". He would not allow me to return it for a refund. I know that ebay is a take your own risk venture - but deliberately lying about the condition of the radio to sell it is dishonest. What a disgrace to the ham community. Don't be suckered by this man like I was.

The next post please put FA = For Auction. That way those of
us that do not read ebay ads in the NGs will not waste our time
on your message..

The NGs title is "ham items for sale" NOT For Auction!!

Just my opinion.

Bob

Bob,

The next post please put AB = Auction Bitch. That way those of us who don't read Auction Bitches in this NG won't waste our time on your message.

The NGs title is "ham items for sale" NOT Bitch about Auctions.

Just my opinion. :-)

Glenn

Depending on what course you followed:

Did you contact him ahead of time (prior to bidding, or at least prior to
close of the bidding) to confirm the description.
If the radio was not as represented you can contact e-bay. They do have
recourse for things misrepresented, but they also expect you to have done
some checking ahead of time as well.

No harm done Daniel. It would have been nice if the net cops just e-mailed
you the citation but they need to make a public grandstand to earn their
buck! You did no harm that I can see. Good luck with the FA.

Glenn

Good evening all. I am in need of four VHF Alphanumeric pagers in the 160 mhz range. My exact frequency is 163.250. They can be new, used, Motorola, or another brand. We will be using them for a local automatic security system. Can anybody help or point me in the direction of one who might? I have heard of a Mr. Radio somewhere in the midwest but have not been able to locate him. Please respond via email. Thanks and 73's Don Smith KB6GQA

812. FA: ICOM IC-737 HF GENERAL COVERAGE

Thanks for reading my message. I have re-listed my Icom IC-737, Bidding starts at $2.00.

Icom IC-737 Mint Condition, If your the winning bidder, you will receive a beautiful General Coverage Rig, Mint cosmetically as well as electronically. Built-In Antenna Tuner, No Microphone. I do have a COPY of the owner's manual.

I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". BUYER pays for all shipping and insurance.

Please contact me for any further information, other pictures are also available of this rig Contact ngwd@flash.net Visit My Website at www.flash.net/~ngwd to see this and all the other items that I'm offering for bidding!

If you would like to BID on the HF rig, please click here.

Charles, do you realise how many personal ham radio related web sites
there are? There are many hundreds of them on the QSL.NET server alone.
Have you thought what would happen if every ham with a web page posted
an advertisement for it in half a dozen of the major ham radio newsgroups?

I certainly hope this nonsense does not become a trend. I would
certainly hate to look through a few hundred web page advertisements
everytime I opened this newsgroup.

You'll have to ignore him, or complain to his ISP. He's crazy, this
is all the life he has, and since that implies running roughshod over
manners and custom, that's what he's going to do.

It sounds like you've had some experience with guy in the past. I
don't know him, so I didn't want to make a major issue out this.
Instead, I was hoping an appeal for restraint would be enough (if not
for him, then for the others reading this thread - who might get the
idea to copy him by posting a message about their own web page).

I just hit the delete key now anytime I see his call in the header information. He posts this crap every ten days in hopes of the uninformed clicking on his web site. Apparently he makes a buck every time someone makes the mistake. He just doesn't get it. There just aren't that many new subscribers to these news groups in any given month, and once you've seen his page, well, you've seen it. You don't want to book mark it, so he is essentially just preaching to the choir and taking up space and time in the process. If he would just once post a serious question on some topic, or answer someone's question with a studied answer I might take him seriously, but I just know that he is vulgar and shallow.

HT is in perfect condition, and DOES include manual, original box, and DOES include the optional carrying case! Only 1 Hour 30 Mins left to bid!! Pictures are available at http://www.flash.net/~ngwd Or to bid on item, please go to http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=440862967

73 Daniel KC4OXP

Questions, please email me directly at ngwd@flash.net

This information is taken directly off of the ICOM IC-T2H brochure.

General
Frequency Coverage:
Tx: 144-148 MHz; Rx: 136-174* MHz (*144 -148 MHz guaranteed)
Mode: FM
Number of memory channels: 43 (40 regular, 2 scan edges and 1 call)
Frequency stability: ± 10 ppm (0°C to +50°C)
Operating Temperature Range: -10°C to +60°C; +14°F to +140°F.
Power supply requirement (negative ground): 9.6 V DC (supplied Ni-Cd cells)
Current Drain (at 9.6 V DC):
Transmit (6.0 W): 1.6 A typical; Transmit (1.0 W): 0.7 A typical
Receive (power saved): 25 mA (typ.); (standby): 80 mA (typ.); (rated audio): 210 mA (typ.)
Antenna connector: BNC (50)
Dimensions (mm/in): 58(W) x 140.5(H) x 32(D) mm; 2.32(W) x 5.5(H) x 1.32(D) in
Weight (approx, w/antenna and battery): 420 g (14.8 oz.)

Transmitter
Output power (at 9.6 V DC): 6 W High, 1 W Low (typical)
Modulation: Variable reactance frequency modulation
Max. frequency deviation: ±5.0 kHz
Spurious emissions: Less than -60 dB
External mic connector: 3-conductor, 2.5 (d) mm (1/10")/2k

Receiver
Receiver system: Double conversion superheterodyne
Intermediate frequencies:
1st: 30.85 MHz
2nd: 450 kHz
Sensitivity (typ. for 12 db SINAD): 0.14 µV
Squelch sensitivity (typ. at threshold): 0.16 µV
Selectivity: More than 15 kHz/-9 dB, Less than 30 kHz/-60 dB

Spurious and image rejection: 60 dB (typical) (more than -45 dB: half image point, except 2nd image)
Audio output power (at 9.6 V DC): 500 mW (typical with an 8 load)
External speaker connector: 3-conductor, 3.5 (d) mm (1/8")/8

IC-T2H Supplied Accessories
Battery case with Ni-Cd cells
Wall charger
Antenna
Belt clip

IC-T2H Options
Battery Packs and Case:
BP-194 R6 (AA) batteries x 8 (with Ni-Cd cells, 6.0 W/3.7 h). Ni-Cd cells in BP-194 must be purchased separately if battery pack is purchased separately from IC-T2H.
BP-195 9.6 V, 700 mAh (6.0 W/3.7 h)
BP-196 9.6 V, 1050 mAh (6.0 W/5.5 h)
All approx. output powers and operating times - Tx (high): Rx: Standby = 1:1:8
Desktop Chargers:

BC-119 + AD-81 Rapidly charges battery packs BP-195 or BP-196. Installed Ni-Cd cells cannot be charged via supplied BP-194 BATTERY CASE. Both AC and DC can be used to power the charger. The AD-81 must be purchased separately.
Speaker-Microphones:

HM-46 SPEAKER-MICROPHONE: Compact and lightweight. Equipped with an earphone jack.
HM-54 SPEAKER-MICROPHONE: Durable, full-sized.
HM-75A REMOTE CONTROL MICROPHONE: Allows you to remotely select memory channels, operating frequency, etc. Simple remote and normal remote are selectable.
Carrying Case:

LC-145 CARRYING CASE: Useable with any battery pack.

824. FA: MFJ 1270C VHF / HF TNC 11 HOURS LEFT TO BID

Ah, I didn't know he was a routine newsgroup spammer. I'm especially glad I didn't visit his web site now. Of course, I don't tend to visit many personal web sites unless I know the person, or I'm having a conversation with that person in a newsgroup.

Nobody could be so dumb as not to realize that you have advertised your
web page about a hundred times in the past two weeks and you chastise
Charles for advertising his one time? Your one line per post has
taken up twenty times as much bandwidth as his single post.

Your explanation is flawed though. It explains that lots of ads and
search engine entries generates lots of web traffic, but doesn't explain
why lots of web traffic is important to you. Let people find you if
you have information they need! No need to advertise.

Hamish

Hello Hamish,
Just how do you propose that " people will find me " if I don't advertise?
Thanks for posting....

Uh, you probalby mean R46A, not S46A, right? According to the Hallicrafters collector guide, it was used with the SX-62A, SX-100, SX-101, SX-101A, and others

>2) what is the value of the speaker today?

Valued at $30-$50 in the book (your mileage may vary, of course).

Charles,

The search engine will lead them to you when they have
the information you need. By all means keep hitting the search engines.
Otherwise, why do you they to find you?

Mr Davies:

You stupid Dipswitch. Read the the News Group titles that this
SPAM was crossposted to.

rec.radio.amateur.dx,rec.radio.amateur.equipment,
rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.swap

Now please tell me what this minusha has to do with these News Groups.

It is just plain SPAM from an IDIOT with another IDIOT defending his
stupid childish actions. where would we be if every IDIOT posted his
Web Page in this News Group

Get a LIFE.. SFB.

Just my opinion..

Yes it probably does and almost everybody does it.. With Most people
it is a URL at the bottom of the showing where to look if they want..

It is NOT as in AB7SL's case where the whole dam message was SPAM.
Their was NO body to the message. ALL WEBPAGE SPAM.

Just my opinion..

Forthcoming family addition demands I get rid of some equipment.
Reluctantly, I offer the following:

Excellent condition IC-735 with 500 Hz CW filter and SM-6 desk mic.
Asking $550, must sell, reasonable offers considered, unreasonable
offers laughed at.

Quicker service to email me at my callsign at midsouth.rr.com or my
callsignat arrl.net

Thanks and 73 de Marty, N5NW

Forthcoming family addition demands I get rid of some equipment.
Reluctantly, I offer the following:

Heavy Duty 35 Amp, 0-16V output, Pyramid power supply, dualmeters
(voltage and amperage). Modified so fan runs all the time, veryquiet.
Will run HF at 100W plus VHF/UHF at 50 watts (typically). Asking$140
plus shipping, no reasonable offer refused.

email to my callsign at midsouth.rr.com or my callsign at arrl.net.

Icom IC-737 Mint Condition.

If your the winning bidder, you will receive a beautiful General Coverage Rig, Mint cosmetically as well as electronically. Built-In Antenna Tuner, No Microphone. I do have a COPY of the owner's manual.

I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "AS-IS".

BUYER pays a flat rate of $30.00 for shipping insurance and handling.

This rig was checked out by a local LICENSED HAM TECHNICIAN in North Georgia, and found to be in EXCELLENT HEALTH (this was less than 3 months ago).

THIS HF RIG IS A RELISTING!! I LOWERED THE ORIGINAL RESERVE PRICE. With the RESERVE lowered to it's current price I am now cutting the rig over $500.00 from what I paid for the rig less than 3 years ago!

ADDED BONUS!! To the HIGH BIDDER & (who meets my reserve price)I am giving FREE a cable that connects the RIG to a IBM Compatible PC. You can "Control" The IC-737 via your computer!! This WAS NOT Included in the orginal offering.

To Bid On This Item, Please Click Here!
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=454010399

Please contact me for any further information ngwd@flash.net

Happy Bidding Good Luck! 73 Daniel KC4OXP

Hello Keith,
Many have taken it upon themselves and totally outside of my control to perpetuate some of the threads that are related to www.ab7sl.com .
Occasionally some of them merit a response from me. More often though I let them go with no response. I believe if you examine the threads you'll see this is the case.

Thanks for posting. 73 / DX

867. www.ab7sl.com - 1 YEAR OLD !!

Newsgroup: rec.radio.amateur.swap
Date: 2000-10-02 00:00:00 UTC
From: Charles <charles@ab7sl.com>
Message-ID: <8ratv9$782$1@nnrp2.phx.gblx.net>

Greetings to all,

As of October 5 ,2000 www.ab7sl.com will have been on the web for a full year. This is a real milestone in the site's existence. www.ab7sl.com started out this time last year with 0 (zero) visitors and now has almost 16,500 visitors on the counter. The average visitor count per day is now at 55 visitors daily . There are nearly 100 entries in the guestbook now and several dozen user-added links on the Free-for-all-Links Page.

Many features have been added since the basic site went up last year. One of the most popular is The DX Page with the active and clickable DX Cluster Telnet links. I have received a lot of positive feedback on that. Another recent feature is the addition of the AB7SL Monthly DX Online Logbook. This page receives several updates - each day - depending on my activity and band conditions. It lists chronologically all the DX stations I have worked for the current month.

The most recently added page is the 3D-Art Gallery which showcases 3D art I have created with Bryce 3D graphics application. Besides the thumbnail for each image there are two popular resolutions available for download that can be used as desktop wallpaper.

www.ab7sl.com has grown tremendously over it's first year and I look forward to sustained and increased growth over the years to come. Thank you all for making www.ab7sl.com a great success for me and all it's users.

73 / DX

This, besides being meaningless, doesn't answer the question put forth to you.
What part of the statement do you disagree with?
"Are YOU the judge and jury?

Do YOU have enforcement power to enforce Federal Rule and Regulations
granted by Congress?"

These are the questions being asked. An inability or unwillingness to answer
would seem to me to be an admission of guilt.

I have 5 of the type M68729 class C (i.e. FM) 30 Watts out average, 40 Watts max. These will replace older M57774 module just fine. The input drive is 300 mW for 30 watts out. I am asking $50.00 including shipping to conus for each of them them. RF parts wants around $70.00 for the same.
I will sell them all for $200, this is the equivalent of getting one for free.

These are brand new never been used and still have the one inch leads on them. I have 4 of them in a sealed rack and one loose.

Thank You,

Bryan Fields, KB9MCI

kb9mci@qsl.net

Scott,

Just wondering if you really need a weekly reminder to visit it though?
Most browsers have bookmarks or favourites which are an excellent feature!

Hi Hamish...

You are right, I don't need a weekly reminder about the site as I have it bookmarked. However, there are new people subscribing to this and other newsgroups on a daily basis who may have never seen one of the posts before. I suspect that is the precise reason why the posts show up frequently. I am always on the lookout for good ham sites, and there are many new ones appearing every day. This is one resource for finding out about new sites or existing sites that I wasn't aware of. Therefore the weekly posts (or whatever frequency they are, I don't count them) don't bother me. My cursor keys work well, so I can choose to scroll right on by any post I don't want to bother with. Included in the posts that usually get this treatment are the VERY frequent childish exchanges of insults and name-calling from people who obviously only like to practice their typing skills. This is a ham dx newsgroup...If someone has a site that will point me to a good new source of information about ham/dx, then I look forward to hearing about them. I don't mind repitition once a week... I DO mind 10 posts daily about how once a week is too much though.

73 and gd DX from Canada

Scott, VE1OP

Icom IC-737 Mint Condition.

This rig was checked out by a local LICENSED HAM TECHNICIAN in North Georgia, and found to be in EXCELLENT HEALTH (this was less than 3 months ago).

THIS HF RIG IS A RELISTING!! I LOWERED THE ORIGINAL RESERVE PRICE. With the RESERVE lowered to it's current price I am now cutting the rig over $500.00 from what I paid for the rig less than 3 years ago!

ADDED BONUS!! To the HIGH BIDDER & (who meets my reserve price)I am giving FREE a cable that connects the RIG to a IBM Compatible PC. You can "Control" The IC-737 via your computer!! This WAS NOT Included in the original offering!

If your the winning bidder, you will receive a beautiful General Coverage Rig, Mint cosmetically as well as electronically. Built-In Antenna Tuner, No Microphone. I do have a COPY of the owner's manual.

I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". BUYER pays a flat rate of $30.00 for shipping insurance and handling.

To Bid On This ICOM IC-737 please click here!

Check it out here......no longer with any reserve....
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=449972468

MFJ-1278B Multi-Mode Data Controller

10 Modes ! with original box and books.

AMTOR, RTTY, ASCII, CW, 16 GRAYLEVEL FAX, NAVTEX,

COLOR SSTV, CONTEST MEMORY KEYER, PACKET, and

PACTOR with 32k Enhanced Mailbox. Also has Turbo with

2400 Modem.

Included is an RS-232 cable for connention to your PC's serial
port and a "radio port cable" for connection to your radio, the
manual has lots of information on hooking the 1278B to various radios.
The A.C. power cube (MFJ-1315) included, used only for a short
while on VHF packet, it's about 5 years old and spent most
of that time in storage, unit still looks like new.

Will warrenty (10 days) that unit is not DOA.

For Sale: HAL DXP-38 TNC (Terminal Node Controller). Does
RTTY, PACTOR, AMTOR and CLOVER. In perfect condition, with
manuals and HAL factory software for Windows and DOS.

See review in April 2000 QST or go to HAL website for pictures
and information:

http://www.halcomm.com

In the QST review, the DXP-38 beat out all the competition for
copying signals under difficult conditions. This is a top of
the line TNC, guaranteed to be in perfect working condition
when received.

Sold new in February 2000 for $395, sell now for $295.
Price includes shipping and insurance to US address.

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1325 plus shipping and insurance from 92083 (Southern CA).

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1325 plus shipping and insurance from 92083 (Southern CA).
PayPal accepted.

The Drake T-4XB has been sold.

I need to clear some space, so I have the following items for sale:

1. Kenwood TS-830S (gold label) and VFO-240. Both are in very good condition cosmetically. The TS-830S has low output (about 40 watts); probably needs new finals. Other than this, it is in very good condition electrically. The VFO-240 is in very good condition electrically. The TS-830S has the optional 500-Hz CW filter. Includes original manual. $400 plus shipping from 78628.

2. Kenwood SM-220 with BS-8 panadaptor. Very good condition electically and cosmetically. Includes original manual. $325 plus shipping from 78628.

3. Drake R-4B and MS4 speaker. All in very good condition electically and cosmetically, except that there is some hum in the R-4B (SSB mode only), probably needs filter caps. $190 plus shipping from 78628.

4. Drake AC4 power supply. Good condition. $60 plus shipping from 78628.

5. Kenwood R-599A receiver. Good condition cosmetically, very good condition electrically. $150 plus shipping from 78268.

6. MFJ 941D antenna tuner, 160-10 meters. Good condition cosmetically, very good condition electrically. $60 plus shipping from 78628.

I prefer to sell these items (I am trying to clear some space after all), but I might be open to interesting trades.

73,
Jeff Kilgore, KC1MK

I have the H.F. module for the Yaesu FT-726R that is surplus to my needs. This module allows one to work the Russian satellites (RS-13/15) or the 15, 12 and 10 meter bands. Works perfectly! Supposed to be 10 watts but, in my rig, I measure a minimum of 10 and up to 15 watts output on the 10 meter band. This unit is rare as owners of FT-726Rs can attest: the module is not listed in the owners operating manual (but it was available!). Genuine Yaesu with cables and mounting hardware. Offers? ns1z@arrl.net

Hello all, recently I bought an Icom IC-901A from someone on Ebay and it was supposed to be working perfectly, it's not. A number of the buttons on the right hand side of the control head (Call, Band, Mhz etc.) are broken (the little plastic parts on the back of the switches are all smashed) so I'm looking for a defective control head (defective pc board or display) that I can get some plastic switch pieces from. If you have a control head that all the switches work on (say the LCD is bad or the PC board is broken, let me know how much you want for it.

Thanks, Jennifer

I have a Kenwood UHF TK-330 10 ch with keypad,and the alpha numberic display, with one battery. It's missing the ant. This radio works and is in fair condition. Programed on the amateur band. I'm looking to trade it for a Motorola VHF MT1000 16 channel with the keypad. No battery neccessary, that can be programed for the amateur 2m band.
I may be contacted via e-mail(n2icv@home.com) or 1-877-527-1765.

HAMFEST October 29, 2000 - Lindenhurst, LI

GREAT SOUTH BAY AMATEUR RADIO CLUB
ARRL APPROVED LONG ISLAND HAMFEST - October 29, 2000

LINDENHURST, LI - NY

On October 29, 2000 the Great South Bay Amateur Radio Club will again
sponsor an indoor Hamfest-Computer Show. The location will be at the:

Knights of Columbus
400 South Broadway, Lindenhurst, NY.
This is an ARRL approved Hamfest.

There will be radio equipment, electronic components, computers and access-
ories, software, books, technical manuals, ARRL information, Amateur Radio
License Exams, Door Prizes.

Advanced registration is $15.00 each table. Tables at the door are $20.00
each. Contact Walter Wenzel KA2RGI at 631 957-0218 for table reservations.
NO TABLES WILL BE RESERVED WITHOUT PRIOR PAYMENT due to the space available.

General admission is $ 6.00. Wife's and children under 12 admitted with no
charge.

VE - ARRL - 12:00 NOON at Babylon Town Hall, 200 E Sunrise Hwy, Lindenhurst.
For exam candidates please remember to bring your original FCC Amateur
Radio license (if licensed), any C.S.C.E. forms that are pending, plus a
photocopy of each, pens, calculator, formal form of ID (preferably photo
ID),
and the examination fee, to the exam session. Current ARRL/VEC fee is $
6.65,
exact change is appreciated.

Talk-in will be via GSBARC Repeater on 146.685 -600 136.5 PL.

Food Service during the Hamfest will be provided by members of the Knights
of Columbus Council.

Information is also available during the GSBARC 2 meter info net every
Monday evening at 7:00 PM following the Newsline Report on the W2GSB
repeater, 146.685 -600 136.5 PL required. You may also write to:

The Drake T-4XB has been sold.

1. Kenwood TS-830S (gold label) and VFO-240. Both are in very good condition cosmetically. The TS-830S has low output (about 40 watts); probably needs new finals. Other than this, it is in very good condition electrically. The VFO-240 is in very good condition electrically. The TS-830S has the optional 500-Hz CW filter. Includes original manual. $325 plus shipping from 78628.

2. Kenwood SM-220 with BS-8 panadaptor. Very good condition electically and cosmetically. Includes original manual. $275 plus shipping from 78628.

3. Drake R-4B and MS4 speaker. All in very good condition electically and cosmetically, except that there is some hum in the R-4B (SSB mode only), probably needs filter caps. $160 plus shipping from 78628.

4. Drake AC4 power supply. Good condition. $50 plus shipping from 78628.

5. Kenwood R-599A receiver. Good condition cosmetically, very good condition electrically. $125 plus shipping from 78268.

6. MFJ 941D antenna tuner, 160-10 meters. Good condition cosmetically, very good condition electrically. $50 plus shipping from 78628.

7. AEA PK-900 multimode TNC. Very good condition; works fine, no dings or scratches. RTTY, Packet, PACTOR, WeFax, AMTOR, and CW. Includes original manual. $125 plus shipping from 78628.

I prefer to sell these items (I am trying to clear some space after all), but I might be open to interesting trades.

The TS-830S/VFO-240, SM-220/BS-8, AC4, and PK-900 have been sold.

The following items are still available.

1. Drake R-4B and MS4 speaker. All in very good condition electically and cosmetically, except that there is some hum in the R-4B (SSB mode only), probably needs filter caps. $160 plus shipping from 78628.

2. Kenwood R-599A receiver. Good condition cosmetically, very good condition electrically. $125 plus shipping from 78268.

3. MFJ 941D antenna tuner, 160-10 meters. Good condition cosmetically, very good condition electrically. $50 plus shipping from 78628.

I prefer to sell these items, but I might be open to interesting trades.

73,
Jeff Kilgore, KC1MK

** This is your chance to get some cheap radios! **

I have a couple of radios on E-bay:

Dx 390 SW radio:
http://cgi.ebay.aol.com/aw-cgi/eBayISAPI.dll?ViewItem&item=475085028

Includes Box, and printout of manaul from RS website. And a set or 2 of D
cells.

If the bids on the DX-390 go over 45.00, I will pay the shipping.

DX 394 for parts.
http://cgi.ebay.aol.com/aw-cgi/eBayISAPI.dll?ViewItem&item=475070567

Radio powers up, it just does not get hardly any reception. In great shape
for parts, all the jacks and switches are in good shape.

This is the guy to stay away from, HE LIES..
He has nothing to sell. he has some junk he is
auctioning on ebay and wanted some free ad
space so he SPAMM'D the NG by NOT putting
FA = For Auction in the subject line.

"if they lie in the subject line, they will lie about
the stuff on ebay that they want you to buy".

Just my opinion..

Bob

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1225 (was 1325) plus shipping and insurance from 92083
(Southern CA).
Certified Check, USPS Money Order or PayPal accepted.

Hello,

I have a Radio Shack Trunk Tracker which works on Motorola I, II, I/II,
GE/Ericsson and Johnson/Uniden trunked systems.

It scans 500 channels and is a slick unit. I need money for school so it
has to go. Low reserve so go ahead and bid.

I just discovered a whole box full of BC-610 coils, that I had forgotten, in my old storage shed.

I'd have to count them, but I think there are maybe 8 to 12. At least two are in the original sealed boxes. I know that there is some duplication as well.

Any one interested?

I need an MN-7000 box for my Cushcraft R-7000 vertical. Mine was damaged by a lightning strike. If you have one you'd like to part with, please let me know.

OR

I have a lightning-damaged R-7000 for sale. Only visible damage is to the MN-7000 box, everything else appears to be undamaged. Even the plastic parts are OK. Of course, I can't be sure the traps are OK without the MN-7000 but everything else looks just fine. I believe it was a near strike, not a direct hit, or the antenna would be history.

If you're interested in selling or buying, please let me know...

When I lived up north it was easy to find a ground for my rigs through the plumbing pipes, etc. Here in Florida however, almost everything is PVC. Here's my plan: I intend to run transmission line into the house through the wall near the station location. There will be a lightening arrestor in the line from the mast mounted vertical. (ten meter vertical, about twenty feet high, I'm starting slow.) It will be adjacent to the transmission line entrance point, connected to an 8 or 9 ft. ground rod. From the ground buss in the shack, I intend to run a bare ground wire through the line access point out to be connected to the same ground rod used for the lightening arrestor.Any comments or suggestions will be appreciated.
Thanks and 73, Jim W2JBS

Being in Florida, the best advice I can add is to set things
up where you can readily DISCONNECT the antenna and and PULL
the ac power physically. Having a good ground is a mixed
blessing if a lightning surge comes in via the power. It'll
jump right thru your gear to get to that nice ground.
Oh, and pull ur telco/modem connection too when a storm is
in the area.

Thanks Bill,
I intend to house the arrestor fitting in an outside enclosure for access to disconnect when a storm is emminent, which is often enough here. Also, we have a drill to pull telephone lines, TV and other power cords at such times.
Vieques, eh? Keep your head down.
Thanks again and 73. Jim

1015. Re: Advise on grounding

Newsgroup: rec.radio.amateur.swap
Date: 2000-11-07 00:00:00 UTC
From: Paul <pvanasse@mail.direcpc.com>
Message-ID: <BbTN5.3577$925.114617@news.direcpc.com>
Source record: 6414
Cross-posted to: alt.ham-radio.marketplace,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap

Hello Jim:

My advise to you is make sure you connect you grounding system to the main electrical service panel ground as per the National Electrical Code. In addition, use multiple points (several ground rods) all connected in series with your station ground which ultimately connects to your electrical service panel ground as well. My QTH is subject to lightning hits (Ive lost computers, tv's, well pumps, electric g-door openers and the like) and this is the only system Ive found that minimizes damage. Of course, nothing can stop damage from a direct lightning hit however one can try to prevent the resulting damage. Also try visiting www.polyphaser.com and look up the essay on "Multiple Point Grounds".

I hope this helps.

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1225 (was 1325) plus shipping and insurance from 92083
(Southern CA).
Certified Check, USPS Money Order or PayPal accepted.

1039. DRAKE SW8 for sale

Newsgroup: rec.radio.amateur.swap
Date: 2000-11-14 01:30:42 UTC
From: jcadwall@altavista.com
Message-ID: <3a109676$1_2@news2.one.net>
Source record: 6437

DRAKE SW8 COMMUNICATIONS RECEIVER & in EXCELLENT + condition.
This radio is thought to be the best performing and sounding transportable shortwave receiver on the current market.
Its ergonomics are fantastic and the three (3) standard filters are all high quality.
This receiver comes with the manual and the AC adapter.
This great receiver.

The radio is a general coverage receiver that covers from 100 Khz to 30,000 Khz continually covering LW (longwave), MW (middle wave - AM) and SW (shortwave), 87 - 108 FM (STEREO through the headphone jack and 118 - 137 AIRCRAFT band. Modes are AM/USB/LSB/CW/FM/SYNCHRONOUS DETECTION standard. Digital PLL synthesized tuning via a keypad, up and down buttons or a large tuning knob. The AM selectivity filters are 2.3 / 4.0 / 6.0 and are selectable in all modes except FM which has it's own 12 khz selectivity filter.

TECHNICAL INFORMATION: Alphanumeric liquid crystal display provides for display of station frequency, Direct entry of mode and bandwidth selection via keypad, Selectable sideband, synchronous AM detector for improved quality of received AM signals, especially under severe fading conditions, Internal "D" cell batteries or AC wall transformer operation, High Dynamic Range allows for detection of weak signals in the presence of strong signals, Outstanding Audio Quality - the hallmark of a Drake receiver, FM Stereo with headphone operation, Extensive panel display of operating parameters including operating mode and band, Scanning capability by memory, 70 programmable channel memories stored in non-volatile memory, Dual time zone clocks, Dual programmable timers, Auto Backlight shutoff to conserve battery life, Low Battery Indicator and MADE IN THE USA .

Money Orders Please, No Personal Checks $495.95 + $14.95 Shipping/Insurance/Packing for domestic US shipment. All used electronics are sold as-is but guaranteed not to be DOA

Please respond
via email to jcadwall@altavista.com

Date: 2000-11-15 07:44:40 UTC
From: JJ&A <w7ls@blarg.net>
Message-ID: <3A123EE8.2E648F7C@blarg.net>
Source record: 6445

Really, really clean Heathkit HW-9 for sale. Comes with original book. No mods. No WARC kit. Nicely done circuit work inside. Not a project. The only thing I would look into is the backlash on the dial. It seems a bit much. I've tried other HW-9 rigs and they seem to have less backlash. Probably an adjustment. Will look into it. Transmits and receives great. Too many rigs standing around here, doing nothing. Need to make some room. $250 plus a few for UPS. MO preferred, check ok.

1059. FS - Gonset SUPER SIX

Newsgroup: rec.radio.amateur.swap
Date: 2000-11-18 21:16:45 UTC
From: Bob W7AVK <rsrolfne@atnet.net>
Message-ID: <3A16F1BD.49EB4DB2@atnet.net>
Source record: 6358

Good Day - For Sale a Gonset SUPER SIX mobile converter. This is a tunable tube converter that covered 10, 11, 15, 19, 20, 40, 49, and 75 meters when operated into the car's radio. Got its power from the car radio and was great for AM operation. Was very popular in the mid and later 1950s.

Unable to try so sold as is. Looks complete and all the controls operate freely. But has a couple scratches on the gray box and a cracked knob.. The extruded aluminum case is good but has a couple small dents that can easily be repaired.

Manual and drawing is on BAMA

$35 plus postage from zip 98837.

73 Bob W7AVK

For Sale:

Kenwood TR-751A 2M All Mode. Works Great, about a 8.5 cosmetically. Mic works, but the DTMF and up/dn buttons on the mic do not (bad cable?). $250.00.

Tempo 2020 10-80M HF Rig w/mic ... Cosmetically quite nice... could use some contact cleaner or pot cleaner on some of the controls... but works good. $200.00

Alinco DJ-S11T 340mw 2M HT... nice little radio, fit's in your shirt pocket. I lost the manual (I may still find it) but have the "quick ref" pdf printout (the actual manual was not much bigger). It's about 18mos old... my wife used it mostly just to listen to me when I was mobile and commuting... $90.00

E-mail if interested

Read the damn Post. This is my standard response.

"Do not trust or do business with this
person . They have SPAMMED
the NG with their eBay Drivel without
inserting FA = For Auction in subject
line so those of us that do not enjoy
auctions can filter said "spam mail""

In other words I have NO problem with
FA, FS or WTB

A lot of us are just getting tired of downloading
something that is interesting to us ONLY to
find that some inconsiderate greedy individuals
has intentionally left out the FA at the begining
of the subject line to "TRICK" people that
otherwise would NOT waste their time on
eBay ads into readind their DRIVEL..

Just my opinion..

Bob

As I've explained before..
Think about it for a sec, ok?
Would it make much sense to use fake name here and then post my
call-sign?...
What would be the point in using a fake name? ;)
If so much personal info couldn't be obtained with it, I'd have no prob at
all posting it here, but...
And I've yet to get any junkmail (that I know of), sales-calls, etc. as a
result of using it on the air, so that is somewhat different...

I don't waste my time with contests, as I've said several times in the past.
It's like visiting places vs just driving thru 'em so you can stick another
tack on the map.
Waste of time, iow. I like to spend time getting to know my contacts.

You just can't stand being hit where it hurts, huh?
(Now, THAT's profound sh*t, huh?)
I've noticed that most contesters seem to get very upset when you compare 'em to the vacationer who's travelling for no reason other than the 'trophy' he gets by sticking another state on the map he's got on the back of his motorhome or whatever.. They can always give you a few textbook answers about the sites they've been to after the fact, but that's about it....
So "What's the point" if not just 'trophies' to brag about, huh?...
And, no, I really don't expect any more of an answer from you than what's quoted below...
You're just a typical contester, "as I said before..." hehe..

Source record: 6306

Hi Gang,

FOR SALE , ICOM IC-4SRA 440 MHz TRANSCEIVER PLUS 50-900 MHz WIDEBAND RECEIVER ! This Icom IC-4SRA is LIKE BRAND NEW ! I'm the original owner and have the instructions as well as the box . This HT has NEVER been outside , in a car , or dropped on the ground ! It's MINT . Some general information

HAM BAND 440 - 450 MHz FM
Pwr settings 5 W , 3.5 W , 1.5 W , and 500mW selectable.
NUMBER OF MEMORY CHANNELS 33
RECEIVER SYSTEM Double - conversion superheterodyne.

RECEIVER BAND Frequency coverage (NO GAPS)
25 - 950 MHZ
MODE AM , FM , and WFM (wide FM)
TUNING STEPS 5, 10 , 12.5, 15 , 20 , 25 , 30 , and 50 kHz and 100 kHz, 1 MHz, 10 MHz for dial select steps.
NUMBER OF MEMORY CHANNELS 63
RECEIVER SYSTEM Triple - conversion superheterodyne.

All antenna's (two) included . Along with the battery pack BP-84 (weak and needs to be replaced) . Also included is the wall wart (AC adapter / charger) . And all documentation . This HT has a ton of features , pager , etc. Too numerous to mention . It's a loaded HT and like new . Oh yeah, it scans as well . So you could use it to listen to Police / Fire calls as well as the whole 800 Mhz cell phone band !! (They don't make um like that anymore !)

I can answer any questions and provide .jpg's via e-mail . I'm asking $225.00 SHIPPED USA only. This rig cost $400.00 new . I can accept Visa / MasterCard payment via PAYPAL . Thanks for reading !

73,
Steve

Greetings:
I have a Toshiba 520CDT notebook for sale. This unit is in excellent condition. It's only been used in a home environment and as a secondary computer (for learning). For detailed specification, go to http://cdgenp01.csd.toshiba.com/content/product/pdf_files/detailed_specs/tecra_720cdt.pdf

In summary, the machine is

166Mhz Pentium MMX processor

2GB Hard disk

64MB RAM

12.1 inch Active Matrix screen

Built-in CD, Sound system, USB port, Modem and 2 PCMCIA ports

Software includes Windows 98 (pre installed). All other software has been removed to comply with copyright laws.

Has battery although I have never used on battery power and cannot confirm the battery condition.

I am asking for $290.00 or better offers. Please reply in email with your location, phone number and offer (above $290 please). I would prefer to sell the unit locally (Sacramento, CA) but will ship if I cannot get any interest locally. No Swaps this time, I am raising cash for xmas :)

Please email me at brumey@subdimension.com

Thanks,

Kevin.

1127. TS850 Help!

Newsgroup: rec.radio.amateur.swap
Date: 2000-12-02 00:42:58 UTC
From: joeram@texas.net
Message-ID: <3a283fd9.4879465@news.texas.net>
Source record: 6324

I recently picked up TS850 with a receiver problem. The radio seems to be slightly less sensitive (compaired to my FT-847) on the lower bands (about 2 S units or so), 160M, 80M, 75M etc, but significantly less sensitive on the higher bands like 10M. On the higher frequencies, my FT-847 can hear a faint signal, one with no S reading, but the TS850 usually does not even hear them.

Also, I noticed that if I turn off the IF filetring or I make them as wide a possible, the receiver performs a little bit better.

I've done some research and found D31 as a possible solution, although the information stated that if D31 is leaky, the receiver will be less sensitive. I don't know if it means the above situation holds ture or if the receive should be less sensitive on all bands.

Also, I noticed there are two amplifier receiver circutis on the RF board which use different transistors for the below 20MHz and above 20MHz. I'm not sure if these are the issue because on the 10M band (with the widest IF filtering) , if I get a strong signal, it will be just as loud and of almost similuar S readings as my FT-847.

I have only 3 days to decide if I want to keep the radio. It is in great condition except for this and I am looking for ways to determine and narrow down what the issue really is. I do not want to get stuck with a radio that needs $300 or more to fix, so please help. Any information you can provide would be of great help!

Thanks for your help!

1134. UPDATE - BAD GUY Alert Jerry Pippins

Newsgroup: rec.radio.amateur.swap
Date: 2000-12-03 00:00:00 UTC
From: N6TGK <n6tgk@home.com>
Message-ID: <axwW5.33341$I5.557571@news1.rdc1.sdca.home.com>
Source record: 6334
Cross-posted to: rec.radio.cb,rec.radio.amateur.swap,rec.radio.amateur.misc,rec.radio.amateur.equipment

I posted a "Bad Guy Alert" here about a week ago concerning Jerry Pippins (aka cbnut24 or cbfixxer). I stated that he was supposed to ship me a Uniden HR-2510 in exchange for my BC895 Trunk Tracker.

Jerry claimed to have shipped the radio on November 13th, I shipped the 895 on the 14th. He got the 895 on the 21st of November. On Thanksgiving day I started asking him where the 2510 was and he came up with a bunch of excuses as to
why it wasn't here. He eventually responded, "Don't be a whine ass, you'll get it." After that, his e-mail address was no longer valid.

On December 2nd I FINALLY received the 2510...postmarked Nov 30!!! But that didn't bother me. At least I had finally gotten the "excellent condition... you'll love
this radio" 2510 that Jerry promised me. Upon opening the box and digging through the packing I found a PATHETIC looking 2510. The case and face plate
was scuffed up like you wouldn't believe. The power plug on the back is broken and
pushes back into the radio whenever you try to connect the power cord, the accessory
plug has epoxy all over it and someone added a speaker jack and did a very poor job
of it. Upon removing the covers I found that the back part of the display was melted
because some MORON removed the original lamp (probably burned out) and replaced
it with a HIGHER wattage lamp. This lamp melted the display to the point that the
lamp will no longer stay in place. Wires have been snipped and slodered to other
locations, obviously an attempt at doing some kind of modifications. There are cold
solder joints, large globs of solder and someone added a small PCB board to the underside
of the RF board and is being held in place by pieces of solder. I have no idea
what this board does. The radio smells like smoke and has the hint of burned components.

I obviously didn't get a fair trade since my 895 was in NEW condition and this 2510 is probably only good for parts.

Avoid this person if you can. I was able to find some feedback about this guy on Yahoo! Auctions and his feedback was very poor. He's still holding to the pattern from those posts: ships late, has several excuses and doesn't send what is promised.

Jerry... if you read these news groups... thanks a lot liar.

Well David E. Eaton has attempted to stiff me for $136.00 for a Kenwood HC-10 clock he claimed to have and if he did it was probobly stolen. I am going after him and the book is being thrown at him. These people who want something for nothing have to be stopped. By the way, I've seen David E. Eatons rap sheet and he is by no means even close to an upstanding citizen.

Hi all.

I'm looking for a couple of noise blankers, one for my Drake TR-5, one
for a TR-7/7A. The applicable Drake model numbers are NB-5 and NB-7
(or NB-7A) respectively.

Please contact me at:

NeilR@innermedia.com

or call (800) 962-2949 (in the USA)
or (603) 465-2788

Must be operational.

Thanks, and any/all leads are gratefully received.

That board is supposed to be there and these radios really don't hold up very well to any kind of abuse. Always check to see if a person sells a lot of items and check to see if they exist on ebay for references and positive feedback. Do a search on dejanews to see if the person had good or bad dealings in the past.

"N6TGK" <n6tgk@home.com> wrote in message news:axwW5.33341$I5.557571@news1.rdc1.sdca.home.com...

GE MP-A VHF 146.-174. 160 channels Aegis digital encryption w/ battery and charger 9-9.5 condition. works great I use it daily. $375.00
GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE MPD VHF 48 channel alpha display with battery and charger. a 9 $125.00
GE PCS I have several VHF and UHF all 2 channel with batteries no chargers $50.00 each
GE Monogram SP2550 VHF ex CSX radio with battery and charger $125.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
GE MPI 2 UHF 2 watt 2 channel programmable radio. I have 3 of these all programmed to the same GMRS split and talk around. all have chargers and good batteries. $65.00 each or $55.00 each for all 3.
Vertex VX500 UHF 32 channel scan with battery and charger. $200.00
GE Master 2 UHF 75 watt. with pre-amp and all accessories. No Icoms $125.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $750.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $300.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $25.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $25.00 I have several of these.
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $25.00 ea.
GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00
GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Motorola thruline wattmeter with 5 watt 500 - 1000 MHz element $65.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface.
TQ2310 suitcase programmer if I can trade above items for it.

Dual band mobile ham radio's. UHF mobile ham radio's
Cash also works

Message-ID: <21016-3A31FC33-1@storefull-161.iap.bryant.webtv.net>
Source record: 6258

I am ordering a Kenwood TH-D7AG HT for Christmas and will no longer be needing the Tigertronics APRS Tracking unit that I purchased about six months ago.

The Tigertonics TM-1+ is a Multimode APRS Tracking unit which I have had GREAT success with. I used the TM-1+ with a Kenwood TH-28A HT and Garmin 45XL GPS unit. I ran the TM-1+ off of a 9 volt battery and never had a single problem.

I paid $109.95 for the unit but will sell for $75 which INCLUDES shipping. This includes the TM-1+, Windows Programming Software, Radio to Tracker patch cable, 9 volt power cable & Manual.

Rather than list all of the features of the unit, please refer to Tigertonics's APRS Websites for more info:

www.tigertronics.com
www.gpstracker.com

Please E-Mail me direct and thanks in advance.

Misc for Sale: I have pictures I can send by email if you like.

1989 International Callbook
1989 United States Callbook
both in excellent condition, $10 plus postage for the pair.

Knight Model KG-687 Sweep / Marker Generator, very good
condition but missing the handle on the top. Still has the plastic
over the front dials.
$30 plus shipping.

Panasonic KX-P1124 printer, excellent condition with owner's
manual, power cable and "six" brand new ribbons. This takes the
small ribbons like the Okidata type printers.
$25 plus shipping.

IBM Proprinter II printer, very good condition, with owner's manual,
power cable and 2 new ribbons.
$20 plus shipping.

Approximately 30 foot roll of "real" ladder line. This is not homebrew
and has plastic spacers installed. Bare copper wire. You need to see
the picture on this one.
Make offer.

Military style phone plugs with the numeration:

ADC PJ051R M642 / 2 - 2 one each
KINGS PJ-055B one each
KINGS PJ-054R one each
JK-26 one each - this one is the
matching in-line jack
for the PJ-054R
Make offer on all, please.

Again, I have pictures I can send to interested parties.
Thanks, Randy N&#65533;SAH

All:

I have decided to sell a computer that I originally purchased for my wife. The machine is a Toshiba Tecra 550CDT. It has a 266Mhz processor, 96MB RAM, 4GB hard disk, USB, 20X CD, 56K modem) see here for exact spec - http://cdgenp01.csd.toshiba.com/content/product/pdf_files/detailed_specs/tecra_550cdt.pdf

I will be asking $390.00 plus shipping. This is exactly what I paid for it 8 months ago. I would prefer to sell it here on the west coast or even in norther calafornia to avoid shipping. However, I will ship it if needed. The computer is is really good condition and has not been used mobile. It come with Windows 95B but no other software due to licencing restrictions.

Please email me at

brumey@subdimension.com

Looking for information on the DC voltage of the optional battery that goes in the AOR 7030? Has anyone used a substitute battery? I believe the AOR unit is a Lead Acid type battery so the voltage is probably more like 13 to 14 volts rather than 12 volts?? AOR charges a hefty $200.00 for this option! Any information would be appreciated. Please email me at rlonn@home.com

Robert
WA6PHN
Near warm (80 Deg.) and sunny San Diego!!

Hi Robert,

I had a 7030 a few years back and seem to recall the receiver needs 15VDC in order to meet its IP3 spec. I picked up a 12V-->15V converter and ran it portable that way.
It should probably be OK at reduced IP3 on 12V

rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.equipment,alt.ham-radio.marketplace,rec.radio.amateur.swap

Several hams have suggested I take TWO of my portable wind-up reel
antenna's and manufacture them together to make a portable dipole
system. So that's what I've done. If you'd like a portable dipole
system made with our wind-up reel antenna's and custom made with ANY
kind of plug on the end...PL-259, 1/8" phone, BNC, etc...just let me
know and I'll
be happy to do it AT NO EXTRA COST. And the shipping is free when you
order two of the reel antenna's, too. To see a photo and to get further
info on the wind-up reel antenna's, just go to http://qth.com/dwm and
click the "Yo-Yo-Tenna" section.

73 and happy holidays;

Bill, WA8MEA @ Jackson, MI QRP Club station: KC8BCR

The extra digit on the display is not a mod, Chris ... it's a built-in
available feature! That is, if you're referring to the 10 khz feature.

To get 10 hz resolution on the main display, press CLEAR while turning on
the power. To set it back to 100 hz resolution, do it again.

If you have the owner's manual, section 4-2-8 will have a list of functions
that can be toggled by pressing a button when you turn on the set.

I don't quite understand what you mean by "power up on SSB", however.

This is the 2nd thread I have seen rhawk@negabits.net engaged in truly
asinine name calling. This, sir, gets you a place in my kill-file. Grow
up. In this newsgroup, how many times do you see a file that is 117kb that
ISN'T binary... and the very next post in the thread is from YOU and it is a
whopping 119kb. Just ignore them, or delete them.

ERRRR....

Since when is TEXT **NOT** ASCII??? Text IS represented by 7 bits of the ASCII code. The graphics characters are formed with the addition of the 8th bit. But...BOTH ARE ASCII!!

I think you perhaps need to get a clue as well.

By the way, why do you keep change your address from "megabits" to "negabits"??? To confuse those who put you in their kill file?

No Binaries, Or HIGH ASCII.. Is that better?

Negabits or megabits tells me where it came from..

Bob

What can I say Coward. at least when I say something I
have the B*LLS to sign it and I do NOT hide behind
a spammed email address using an AKA.. Just look in the header.

you remind me of a cop, they do not have "Balls" either

My Opinion..

I am using version 1.0 dated 12/15/99.

Does anyone know where I can get a later version or any patches
for the sw itself. I am having problems with bad file saves and
I know the system is ok.

Please email direct: josttech@mediaone.net

Thanks in advance, John w1hzh

From: Pacman <nospam-pacman@bcl.net>
Message-ID: <gw526.26084$BC.469143@e420r-atl2.usenetserver.com>
Source record: 6214

Alinco DJ-580T. RX is 108-129.995 AM 130-174 FM 400-520 and 810-999 MHz with no gaps in the cell portion. It will transmit 140-150 and 420-450 and out of band although I've had no need for it.

This unit even comes with some extras. Alinco Soft case,
Alinco lighter adapter, 2 battery packs and 1 alkaline case. Desh top charger, Maha Speaker Mic, 2 dual band duck ant and manual.

Would like to trade for a lap top computer send me a email with what you have to: pacman@bcl.net

Yep - That's rite!

I wanna buy you cruddy CONAR Receiver model 500.

Come on, get your butt off the couch and get your nose into the junkbox in
the garage and dig it out.

It's been waiting there for 35 years since you last fired it up as a Novice.
You're not going to do anything with it during the next 35 years.

So sell it to me, so I can put it in my junkbox in the garage.

email me if you found it.

1211. Trade for you extra HF Transceiver

Newsgroup: rec.radio.amateur.swap
Date: 2000-12-25 22:57:55 UTC
From: Virgil Stamps <stamps@brokersys.com>
Message-ID: <928jdl$2206$1@news.hal-pc.org>
Source record: 6209

I have a ver clean Tektronix 2213 Dual-Trace 60Mhz Oscilloscope ($600) I would like to trade for a HF rig of equal value. I am getting back into Amateur Radio after many years of doing other things. Got my Extra license recently.

The TEKTRONIX 2213 Oscilloscope is a rugged, light-weight, dual-channel, 60 MHZ instrument that features a bright, sharply defined trace on an 80- by 100-mm cathode-ray tube (crt). Its vertical system provides calibrated deflection factors from 2 mV per division to 10 V per division. Trigger circuits enable stable triggering over the full bandwidth of the vertical system. The horizontal system provides calibrated sweep speeds from 0.5 s per division to 50 ns per division along with a delayed-sweep feature. A x10 magnifier extends the maximum sweep speed to 5 ns per division.Weight: 16.8 lb; Height with feet and handle: 5.4 in.; Width with handle:
14.2 in.; Depth with handle extended: 20.1 in.; Line voltage: 90V to 250V nominal at 48 - 62 Hz;

Includes a Tektronix P6109B 100Mhz 10x probe. No dints, dings or scratches. Original owner.
Lightly used in my consulting business on the bench. Like new service manual. The Oscilloscope is in good working order. I have 2 scopes and 0 ham gear so I need a swap.

Still Looking for the operational manual for a Philips AL990
communications
portable receiver. A service manual would be a big plus as well. Will be
willing to pay copy fees and shipping or I may have some literature you
need? Thanks in advance, Picture of
radio is shown below! email me directly at rlonn@home.com
